1 RECITALS

2 1. The Case. The above action was filed on October 18,
3 1963, seeking adjudication of the water rights of substantially
4 all water users in the area tributary to Prado Dam in the Santa Ana
5 Watershed. There were in excess of 2,500 defendants served and
6 named in the original complaint and amendments thereto.

7 2. Proposed Physical Solution. As a means of settling this
8 action, a physical solution has been negotiated by plaintiff
9 Orange County Water District and defendants Chino Basin Municipal
10 Water District, Western Municipal Water District of Riverside
11 County, and San Bernardino Valley Municipal Water District. Said
12 physical solution accomplishes a general inter-basin allocation
13 of the natural water supply of the Santa Ana River system and
14 leaves to each of the major hydrologic units in the watershed the
15 determination and regulation of individual rights therein and the
16 development and implementation of its own basin management plans.

17 3. It is proposed by plaintiff Orange County Water
18 District to enter a dismissal as to all defendants other than said
19 three municipal water districts, conditioned only upon the accept-
20 ance of this stipulation by the defendants who are listed as sig-
21 natories hereinbelow, and their agreement to cooperate with the
22 physical solution.

23 STIPULATION

24 IT IS HEREBY STIPULATED by and between Plaintiff Orange
25 County Water District and the undersigned defendants as follows:

26 1. Dismissal of Individual Defendants. Orange County
27 Water District agrees to the entry of an order by the Court dis-
28 missing, on the ground that they are not necessary parties to the
29 physical solution, each and all of the individual defendants here-
30 in excepting only Chino Basin Municipal Water District, Western
31 Municipal Water District of Riverside County, and San Bernardino
32 Valley Municipal Water District. Said dismissals shall be in

1 consideration of the stipulation by the undersigned defendants to
2 the covenants hereinafter contained.

3 2. Acceptance of Physical Solution. The undersigned de-
4 fendants hereby accept and adopt the physical solution set forth
5 in the form of judgment attached hereto, subject to the provisions
6 of Paragraph 3, below. Nothing herein contained, however, shall
7 preclude the assertion, protection and preservation of the water
8 rights of any of the undersigned defendants among themselves, nor
9 shall any provision herein limit the flood control function of any
10 flood control district.

11 3. Support of Conservation Activities. It is recognized
12 that the physical solution in said Judgment contemplates that
13 Orange County Water District and other entities downstream from
14 Prado Dam will have full freedom to engage in any activities for
15 conservation or storage of Storm Flow at or below Prado Reservoir
16 subject only to flood control use. The undersigned defendants
17 hereby covenant and agree not to oppose any project for conservation
18 of Storm Flow in the storage capacity of Prado Reservoir below the
19 514 foot contour above sea level which involves the impounding of
20 Storm Flow in the Reservoir with controlled release at the maximum
21 rate consistent with the hydrological capability of the downstream
22 area to absorb such released flow and avoid waste to the ocean.

23 4. Water Quality Cooperation. Any of the undersigned de-
24 fendants who participate directly in the management or control of
25 sewage or other water treatment facilities agree that any water or
26 effluent deposited by them into the Santa Ana River or its stream
27 bed will not be of a lesser quality than will meet the present
28 requirements of Santa Ana River Basin Regional Water Quality
29 Control Board.

30 5. Execution in Counterpart. This stipulation may be exe-
31 cuted in counterparts (each counterpart being an exact copy or
32 duplicate of the original) and the signature pages from each

counterpart may be collected by the County Clerk and attached to a single copy of the stipulation for filing. Thereupon said filed document shall be considered as constituting one complete Stipulation for Dismissal.

RECITALS

1. The Case. The above action was filed on October 18, 1963, seeking adjudication of the water rights of substantially all water users in the area tributary to Prado Dam in the Santa Ana River Watershed. By thirteen cross-complaints filed in 1968, more than 1,500 cross-defendants claiming rights in Orange County were added to said adjudication.

2. Proposed Physical Solution. As a means of settling this action, a physical solution has been negotiated by plaintiff Orange County Water District and defendants Chino Basin Municipal Water District, Western Municipal Water District of Riverside County, and San Bernardino Valley Municipal Water District. Said physical solution accomplishes a general inter-basin allocation of the natural water supply of the Santa Ana River system and leaves the determination and regulation of individual rights to the development and implementation of basin management plans within each of the major hydrologic units in the watershed.

3. It is proposed by cross-complainants to enter a dismissal as to all cross-defendants other than Orange County Water District, conditioned only upon the acceptance of this stipulation by the cross-defendants who are listed as signatories herein below, and their agreement to cooperate with the physical solution.

STIPULATION

IT IS HEREBY STIPULATED by and between cross-complainants and the undersigned cross-defendants as follows:

1. Dismissal of Individual Cross-defendants. Cross-complainants agree, by and through their respective counsel, to the entry of an order by the Court dismissing, on the ground that they are not necessary parties to the physical solution, each and all of the individual cross-defendants herein excepting Orange County Water District. Said dismissals shall be in consideration of the stipulation by the undersigned cross-defendants to the

1 covenants hereinafter contained.

2 2. Acceptance of Physical Solution. The undersigned cross-
3 defendants hereby accept and adopt the physical solution set forth
4 in the form of Judgment attached hereto. Nothing herein contained,
5 however, shall preclude the assertion, protection and preservation
6 of the water rights of any of the undersigned cross-defendants
7 among themselves, nor shall any provision herein limit the flood
8 control function of any flood control district.

9 3. Support of Conservation Activities. It is recognized
10 that the physical solution in said Judgment contemplates that
11 Chino Basin Municipal Water District, Western Municipal Water Dis-
12 trict of Riverside County, and San Bernardino Valley Municipal
13 Water District, and other entities upstream from Prado Dam shall
14 have full freedom to engage in any activities for conservation or
15 storage above Prado Reservoir, provided that the Base Flow obliga-
16 tions in Paragraphs 5(b) and (c) of the Judgment herein are ful-
17 filled. The undersigned cross-defendants hereby covenant and
18 agree not to oppose any such conservation or storage project.

19 4. Execution in Counterpart. This stipulation may be exe-
20 cuted in counterparts (each counterpart being an exact copy or
21 duplicate of the original) and the signature pages from each
22 counterpart may be collected by the County Clerk and attached to a
23 single copy of the stipulation for filing. Thereupon said filed
24 document shall be considered as constituting one complete Stipula-
25 tion for Dismissal.

RECITALS

1. The Case. The complaint herein, filed October 18, 1963, seeks an adjudication of water rights against more than 2,500 water users in the area tributary to Prado Dam within the Santa Ana Watershed. Included among said defendants are defendants Chino Basin Municipal Water District, Western Municipal Water District of Riverside County and San Bernardino Valley Municipal Water District, herein referred to as "Upper Districts". By thirteen cross-complaints filed in 1968, said adjudication was extended to more than 1,500 water users in the area within said watershed downstream from Prado Dam, including plaintiff and cross-defendant Orange County Water District, herein called "Lower District". Substantially all individual defendants and cross-defendants have appeared in the case individually or as represented by Upper Districts or Lower District, respectively.

2. Negotiated Settlement and Physical Solution. The parties to this case have diligently pursued a settlement and physical solution in order to avoid the enormous and unwieldy litigation which is necessarily involved in disposition of such a plenary adjudication. A sound and equitable physical solution, in the nature of an inter-basin allocation, has been developed which can be implemented and enforced through the statutory power and financial ability of Upper Districts and Lower District and which does not require direct participation by, or limitation on the rights or practices of, individual defendants or cross-defendants in this litigation.

3. Dismissal of Individual Parties. Concurrently with the filing of this stipulation there are being filed two stipulations and orders for dismissal of the individual defendants (other than Upper Districts) and the individual cross-defendants (other than plaintiff and cross-defendant Lower District).

STIPULATION

IT IS HEREBY STIPULATED by and between Upper Districts and Lower District as follows:

1. Entry of Judgment. A Judgment in the form attached hereto may be made and entered by the Court in the above-entitled action, and each of the undersigned covenants and agrees to carry out the obligations imposed upon it by said Judgment.

2. Waiver of Findings and Conclusions. The parties hereto hereby waive any and all Findings of Fact, Conclusions of Law, and any and all notice of the making and entry herein of the attached form of Judgment, and all rights of appeal, if any, from such Judgment.

3. Support of Water Conservation Activities. It is recognized that the physical solution in said Judgment contemplates that Upper Districts and other upstream entities will have full freedom to engage in any activity for water conservation or storage of storm flows above Prado Reservoir and Lower District and other downstream entities will be free to engage in any activity for water conservation or storage of storm flows at or below Prado Reservoir. The undersigned covenant and agree to support such water conservation and storage projects. Subject to the rights of Lower District and other downstream entities and to priority for flood control and water conservation purposes, Upper Districts and other upstream entities shall not be precluded from participating in the use of Prado Reservoir for recreational purposes and non-tributary water storage.

4. Water Quality. Water quality requirements, objectives and policy are a function of the Santa Ana River Basin Regional Water Quality Control Board and such other governmental agencies now in existence or as may be hereafter created or vested with such regulatory power. The provisions in the Judgment relating to quality are not to be construed or deemed to affect, or in any

1 way detract from the right of any party hereto to urge such Board
2 or other appropriate agency to take action designed to change or
3 enforce water quality requirements, objectives and policy.

4 Any of the undersigned defendants who participate directly
5 in the management or control of sewage or other water treatment
6 facilities agree that any water or effluent deposited by them into
7 the Santa Ana River or its stream bed will not be of a lesser
8 quality than will meet the present requirements of Santa Ana River
9 Basin Regional Water Quality Control Board.

10 5. Prior Agreements. OCWD is the successor in interest to
11 the rights of Anaheim Union Water Company and the Santa Ana Valley
12 Irrigation Company, and, to the extent of its ownership of certain
13 lands formerly held by the Santa Ana River Development Company,
14 also to the rights of such company, in and to the following des-
15 cribed written agreements. OCWD, for itself and as such successor
16 in interest to said company, does hereby waive and release all
17 right, title and interest in and to said agreements and the en-
18 forcement thereof. Such agreements are described as follows:

19 (a) Agreement dated August 25, 1910, and
20 amended May 12, 1917, between the Santa Ana River
21 Development Company, the Santa Ana Valley Irriga-
22 tion Company, the Anaheim Union Water Company, and
23 The Gage Canal Company.

24 (b) Agreement dated October 2, 1909, and amended
25 May 12, 1917 and November 2, 1925, between the Anaheim
26 Union Water Company, the Santa Ana Valley Irrigation
27 Company, the Santa Ana River Development Company and
28 the Riverside Water Company.

29 (c) Agreement dated April 19, 1910, between
30 the Santa Ana River Development Company, the Santa
31 Ana Valley Irrigation Company, the Anaheim Union
32 Water Company and the Riverside Highland Water Company.

(d) Agreement dated November 11, 1912, between the Sunny Slope Land Company and the Anaheim Union Water Company, the Santa Ana Valley Irrigation Company and the Santa Ana River Development Company.

(e) Agreement dated May 4, 1911, between the Rivino Water Company and Rivino Land Company, and the Santa Ana River Development Company, the Santa Ana Valley Irrigation Company and the Anaheim Union Water Company.

(f) Agreement dated July 3, 1911, between C. C. Pond, et al., and the Santa Ana River Development Company, the Santa Ana Valley Irrigation Company, and the Anaheim Union Water Company.

1 supply of the Santa Ana River system. Sufficient information and
2 data of a general nature are known to formulate a reasonable and
3 just allocation as between the major hydrologic sub-areas within
4 the watershed, and such a physical solution will allow the public
5 agencies and water users within each such major hydrologic sub-
6 area to proceed with orderly water resource planning and develop-
7 ment.

8 e. Parties. Orange County Water District, Chino Basin
9 Municipal Water District, Western Municipal Water District of
10 Riverside County and San Bernardino Valley Municipal Water District
11 are public districts overlying, in the aggregate, substantially all
12 of the major areas of water use within the watershed. Said dis-
13 tricts have the statutory power and financial resources to imple-
14 ment a physical solution. Accordingly, dismissals have been entered
15 as to all defendants and cross-defendants other than said four pub-
16 lic districts.

17 f. Cooperation by Dismissed Parties. As a condition of
18 dismissal of said defendants and cross-defendants, certain of said
19 parties have stipulated to cooperate and support the inter-basin
20 water quality and water management objectives of the physical solu-
21 tion and this Judgment.

22 DECREE

23 NOW, THEREFORE, IT IS HEREBY ORDERED, ADJUDGED AND DECREED:

24 1. Jurisdiction. The Court has jurisdiction of the subject
25 matter of this action and of the parties herein.

26 2. Exhibits. The following exhibits are attached to this
27 Judgment and made a part hereof.

28 (a) Exhibit A -- map entitled "Santa Ana River
29 Watershed", showing boundaries and other relevant
30 features of the area subject to this Judgment.

31 (b) Exhibit B -- Engineering Appendix.

32 3. Definitions. As used in this Judgment, the following

1 terms shall have the meanings herein set forth:

2 (a) OCWD -- Orange County Water District,
3 appearing and acting individually and in a represen-
4 tative capacity for and on behalf of all riparian,
5 overlying and other landowners, water users and in-
6 habitants within said District pursuant to Subdivision
7 7 of Section 2 of the Orange County Water District Act,
8 as amended.

9 (b) CBMWD -- Chino Basin Municipal Water District,
10 appearing and acting pursuant to Section 71751 of the
11 California Water Code.

12 (c) WMWD -- Western Municipal Water District of
13 Riverside County, appearing and acting pursuant to
14 said Section 71751.

15 (d) SBVMWD -- San Bernardino Valley Municipal Water
16 District, appearing and acting pursuant to said Section
17 71751.

18 (e) Upper Districts -- CBMWD, WMWD and SBVMWD.

19 (f) Upper Area -- The area on Exhibit A which lies
20 upstream from Prado.

21 (g) Lower Area -- The area on Exhibit A which lies
22 downstream from Prado.

23 (h) Prado -- Said term shall be synonymous with
24 Prado Dam, a facility constructed and maintained by the
25 United States Corps of Engineers, as shown on Exhibit A.

26 (i) Riverside Narrows -- That bedrock narrows
27 in the Santa Ana River indicated as such on Exhibit A.

28 (j) Storm Flow -- That portion of the total sur-
29 face flow passing a point of measurement, which orig-
30 inates from precipitation and runoff without having
31 first percolated to ground water storage in the zone
32 of saturation, calculated in accordance with procedures

referred to in Exhibit B.

(k) Base Flow -- That portion of the total surface flow passing a point of measurement, which remains after deduction of Storm Flow, and modified as follows:

(1) At Prado. Base Flow shall:

(i) include any water caused to be delivered by CBMWD or WMWD directly to OCWD, pursuant to its direction and control and not measured at the gages at Prado;

(ii) exclude any nontributary water or reclaimed sewage water purchased by OCWD and delivered into the river upstream and which subsequently passes Prado, and

(iii) exclude water salvaged from evapo-transpiration losses by OCWD on lands presently owned by it above Prado.

(2) At Riverside Narrows. Base Flow shall:

(i) include any water caused to be delivered by SBVMWD directly to CBMWD or WMWD pursuant to their direction and control, or directly to OCWD with the consent of CBMWD and WMWD and pursuant to the direction and control of OCWD, and not measured at the gage at Riverside Narrows;

(ii) exclude any nontributary water purchased by CBMWD, WMWD or OCWD and delivered into the river upstream and which subsequently passes Riverside Narrows; and

(iii) exclude any effluent discharged from the City of Riverside sewage treatment plant.

1 (1) TDS -- Total dissolved solids determined as
2 set forth in Exhibit B.

3 (m) Water Year -- The period from October 1 to
4 the following September 30. Where reference is made
5 herein to "year" or "annual", such terms shall be con-
6 strued as referring to Water Year, unless the context
7 indicates otherwise.

8 (n) Adjusted Base Flow -- Actual Base Flow in
9 each year adjusted for quality as provided herein-
10 below. Compliance with the respective obligations
11 under Paragraph 5 shall be measured by the Adjusted
12 Base Flow.

13 4. Declaration of Rights. Substantially all of the parties
14 to this action, whether situate in Upper Area or Lower Area have or
15 claim rights to the use of a portion of the water supply of the
16 Santa Ana River system. In the aggregate, water users and other
17 entities in Lower Area have rights, as against all Upper Area
18 claimants, to receive an average annual supply of 42,000 acre feet
19 of Base Flow at Prado, together with the right to all Storm Flow
20 reaching Prado Reservoir. Water users and other entities in Upper
21 Area have rights in the aggregate, as against all Lower Area claim-
22 ants, to divert, pump, extract, conserve, store and use all surface
23 and ground water supplies originating within Upper Area without
24 interference or restraint by Lower Area claimants, so long as Lower
25 Area receives the water to which it is entitled under this Judgment
26 and there is compliance with all of its provisions.

27 5. Physical Solution. The Court hereby declares the
28 following physical solution to be a fair and equitable basis for
29 satisfaction of all said rights in the aggregate between Lower Area
30 and Upper Area. The parties are hereby ordered and directed to
31 comply with this Physical Solution and such compliance shall con-
32 stitute full and complete satisfaction of the rights declared in

1 Paragraph 4 hereof.

2 (a) General Format. In general outline, SBVMWD
3 shall be responsible for the delivery of an average
4 annual amount of Base Flow at Riverside Narrows.
5 CBMWD and WMWD shall jointly be responsible for an
6 average annual amount of Base Flow at Prado. Inso-
7 far as Lower Area claimants are concerned, Upper Area
8 water users and other entities may engage in unlimited
9 water conservation activities, including spreading,
10 impounding and other methods, in the area above Prado
11 Reservoir, so long as Lower Area receives the water
12 to which it is entitled under the Judgment and there
13 is compliance with all of its provisions. Lower Area
14 water users and other entities may make full conser-
15 vation use of Prado Dam and reservoir, subject only
16 to flood control use.

17 (b) Obligation of SBVMWD. SBVMWD shall be re-
18 sponsible for an average annual Adjusted Base Flow
19 of 15,250 acre feet at Riverside Narrows. A contin-
20 uing account, as described in Exhibit B, shall be
21 maintained of actual Base Flow at Riverside Narrows,
22 with all adjustments thereof and any cumulative debit
23 or credit. Each year the obligation to provide Base
24 Flow shall be subject to the following:

25 (1) Minimum Annual Quantities. Without
26 regard to any cumulative credits, or any
27 adjustment for quality for the current Water
28 Year under subparagraph (2) hereof, SBVMWD
29 each year shall be responsible at Riverside
30 Narrows for not less than 13,420 acre feet of
31 Base Flow plus one-third of any cumulative
32 debit; provided, however, that for any year

1 commencing on or after October 1, 1986, when
2 there is no cumulative debit, or for any year
3 prior to 1986 whenever the cumulative credit
4 exceeds 10,000 acre feet, said minimum shall
5 be 12,420 acre feet.

6 (2) Adjustment for Quality. The amount
7 of Base Flow at Riverside Narrows received
8 during any year shall be subject to adjustment
9 based upon the weighted average annual TDS in
10 such Base Flow, as follows:

11 If the Weighted 12 Average TDS in 13 Base Flow at Riverside Narrows is:	Then the Adjusted Base Flow shall be determined by the formula:
14 Greater than 700 ppm	$Q - \frac{11}{15,250} Q \text{ (TDS-700)}$
15 600 ppm - 700 ppm	Q
16 Less than 600 ppm	$Q + \frac{11}{15,250} Q \text{ (600-TDS)}$

17 Where: Q = Base Flow actually received.

18 (3) Periodic Reduction of Cumulative Debit.

19 At least once in any ten (10) consecutive years
20 subsequent to October 1, 1976, SBVMWD shall pro-
21 vide sufficient quantities of Base Flow at Riverside
22 Narrows to discharge completely any cumulative
23 debits. Any cumulative credits shall remain on
24 the books of account until used to offset any
25 subsequent debits, or until otherwise disposed of
26 by SBVMWD.

27 (c) Obligation of CBMWD and WMWD. CBMWD and
28 WMWD shall be responsible for an average annual
29 Adjusted Base Flow of 42,000 acre feet at Prado. A
30 continuing account, as described in Exhibit B, shall
31
32

1 be maintained of actual Base Flow at Prado, with all
2 adjustments thereof and any cumulative debit or
3 credit. Each year the obligation to provide Base
4 Flow shall be subject to the following:

5 (1) Minimum Annual Quantities. Without
6 regard to any cumulative credits, or any adjust-
7 ments for quality for the current Water Year
8 under subparagraph (2) hereof, CBMWD and WMWD
9 each year shall be responsible for not less than
10 37,000 acre feet of Base Flow at Prado, plus one-
11 third of any cumulative debit; provided, however,
12 that for any year commencing on or after October 1,
13 1986, when there is no cumulative debit, or for
14 any year prior to 1986 whenever the cumulative
15 credit exceeds 30,000 acre feet, said minimum
16 shall be 34,000 acre feet.

17 (2) Adjustment for Quality. The amount of
18 Base Flow at Prado received during any year
19 shall be subject to adjustment based upon the
20 weighted average annual TDS in Base Flow and
21 Storm Flow at Prado as follows:

22	If the Weighted Average	Then the Adjusted Base
23	TDS in Base Flow and	Flow shall be deter-
	<u>Storm Flow at Prado is:</u>	<u>mined by the formula:</u>
24	Greater than 800 ppm	$Q - \frac{35}{42,000} Q \text{ (TDS-800)}$
25	<hr/>	<hr/>
26	700 ppm - 800 ppm	Q
27	<hr/>	<hr/>
28	Less than 700 ppm	$Q + \frac{35}{42,000} Q \text{ (700-TDS)}$

29 Where: Q = Base Flow actually received.

30 (3) Periodic Reduction of Cumulative Debit.
31 At least once in ten (10) consecutive years sub-
32 sequent to October 1, 1976, CBMWD and WMWD shall

1 provide sufficient quantities of Base Flow at
2 Prado to discharge completely any cumulative
3 debits. Any cumulative credits shall remain
4 on the books of account until used to offset
5 any subsequent debits, or until otherwise dis-
6 posed of by CBMWD and WMWD.

7 (d) Inter-basin Export. Upper Districts are
8 hereby restrained and enjoined from exporting water
9 from Lower Area to Upper Area, directly or indirectly.
10 OCWD is enjoined and restrained from pumping, produc-
11 ing and exporting or directly or indirectly causing
12 water to flow from Upper to Lower Area, except as to
13 salvage of evapo-transpiration losses, as follows:
14 OCWD owns certain lands within and above Prado Reser-
15 voir on which it has or claims certain rights to sal-
16 vage evapo-transpiration losses by pumping or otherwise.
17 Pumping for said salvage purposes shall not exceed
18 5,000 acre feet of ground water in any water year.
19 Only the actual net salvage, as determined by the
20 Watermaster, shall be excluded from Base Flow.

21 (e) Inter-basin Acquisition of Rights. The
22 acquisition by Upper Districts or other Upper Area
23 entities of Lower Area water rights shall in no way
24 affect or reduce Lower Area's entitlement; and the
25 acquisition of Upper Area water rights by OCWD or
26 other Lower Area entities shall be deemed to be in-
27 cluded within the aggregate entitlement of Lower Area
28 and shall not increase said entitlement.

29 (f) Effective Date. Obligations under this
30 physical solution shall accrue from and after
31 October 1, 1970.

32 6. Prior Adjudications. So long as SBVMWD is in

1 compliance with the terms of the physical solution herein, OCWD is
2 enjoined and restrained from enforcing the judgments listed below
3 against SBVMWD or any entities within or partially within SBVMWD
4 which have stipulated to accept and adopt such physical solution.
5 So long as WMWD and CBMWD are in compliance with the terms of the
6 physical solution, OCWD is enjoined and restrained from enforcing
7 the judgments listed below against WMWD and CBMWD or any entities
8 within or partially within WMWD or CBMWD which have stipulated to
9 accept and adopt such physical solution.

10 (a) The Irvine Company, plaintiff, Orange County
11 Water District, intervenor, vs. San Bernardino Valley
12 Water Conservation District, et al., defendants,
13 U. S. Dist. Ct., S.D. Cal. Civ. No. Y-36-M, judgments
14 entered September 11, 1942 (Judgment Book 11 page 134),
15 and recorded Book 1540 page 251 and Book 1541 page 85,
16 Official Records of San Bernardino County.

17 (b) Orange County Water District vs. City of
18 Riverside, et al., San Bernardino Superior Court
19 No. 84671.

20 7. Watermaster. The Watermaster, when appointed by the
21 Court, shall administer and enforce the provisions of this Judg-
22 ment and the instructions and subsequent orders of this Court.

23 (a) Composition, Nomination and Appointment.
24 The Watermaster shall consist of a committee com-
25 posed of five (5) persons. CBMWD, WMWD and SBVMWD
26 shall each have the right to nominate one represen-
27 tative and OCWD shall have the right to nominate
28 two (2) representatives to the Watermaster committee.
29 Each such nomination shall be made in writing, served
30 upon the other parties to the Stipulation for this
31 Judgment and filed with the Court. Said Watermaster
32 representatives shall be appointed by and serve at

1 the pleasure of and until further order of this Court.

2 (b) Watermaster Determinations. Each and every
3 finding and determination of the Watermaster shall be
4 made in writing certified to be by unanimous action
5 of all members of the Watermaster Committee. In the
6 event of failure or inability of said Watermaster
7 Committee to reach unanimous agreement, the fact,
8 issue, or determination in question shall forthwith
9 be certified to this Court by the Watermaster, and
10 after due notice to the parties and opportunity for
11 hearing, said matter shall be determined by order of
12 this Court.

13 (c) Annual Report. The Watermaster shall report
14 to the Court and to each party in writing not more
15 than five (5) months after the end of each Water
16 Year, each of the items required by Paragraph 4 of
17 the Engineering Appendix, Exhibit B hereto, and such
18 other items as the parties may mutually request or
19 the Watermaster may deem to be appropriate. All of
20 the books and records of the Watermaster which are
21 used in the preparation of, or are relevant to, such
22 reported data, determinations and reports shall be
23 open to inspection by the parties to the Stipulation
24 for Judgment herein.

25 (d) Watermaster Service Expenses. The fees,
26 compensation and expenses of each representative
27 on the Watermaster shall be borne by the district
28 which nominated such person. All other Watermaster
29 service costs and expenses shall be borne by the
30 parties in the following proportions:

31 OCWD - 40%

32 CBMWD - 20%

1 SBVMWD - 20%

2 WMWD - 20%

3 The Watermaster may from time to time in its discre-
4 tion require advances of operating capital from the
5 parties in said proportions.

6 8. Continuing Jurisdiction of the Court. Full jurisdic-
7 tion, power and authority are retained and reserved by the Court
8 for the purpose of enabling the Court, upon application of any
9 party or of the Watermaster by motion and upon at least 30 days'
10 notice thereof, and after hearing thereon:

11 (a) To make such further or supplemental orders
12 or directions as may be necessary or appropriate for
13 the construction, enforcement or carrying out of
14 this Judgment, and

15 (b) To modify, amend or amplify any of the pro-
16 visions of this Judgment whenever substantial changes
17 or developments affecting the physical, hydrological
18 or other conditions dealt with herein may, in the
19 Court's opinion, justify or require such modification,
20 amendment or amplification; provided, however, that
21 no such modification, amendment or amplification shall
22 change or alter (1) the average annual obligation of
23 CBMWD and WMWD for delivery of 42,000 acre feet of
24 Base Flow per year at Prado, (2) the average annual
25 obligation of SBVMWD for delivery of 15,250 acre feet
26 of Base Flow per year at Riverside Narrows, (3) the
27 respective minimum Base Flows at Riverside Narrows and
28 Prado, nor (4) the right of the parties to this Judg-
29 ment or of those who stipulate to accept and adopt the
30 physical solution herein to conserve or store flows.

31 9. Notices. All notices, requests, objections, reports
32 and other papers permitted or required by the terms of this

1 Judgment shall be given or made by written document and shall be
2 served by mail on each party and its attorney entitled to notice
3 and where required or appropriate, on the Watermaster. For all
4 purposes of this paragraph, the mailing address of each party and
5 attorney entitled to notice shall be that set forth below its sig-
6 nature in the Stipulation for Judgment, until changed as provided
7 below. If any party or attorney for a party desires to change its
8 designation of mailing address, it shall file a written notice of
9 such change with the Clerk of this Court and shall serve a copy
10 thereof by mail on the Watermaster. Upon receipt of any such
11 notice, the Watermaster shall promptly give written notice there-
12 of. Watermaster addresses for notice purposes shall be as speci-
13 fied in the orders appointing each representative on the Water-
14 master.

15 10. Successors. No party shall dissolve, nor shall it
16 abandon or transfer all or substantially all of its powers or
17 property, without first providing for its obligations under this
18 Judgment to be assumed by a successor public agency, with the
19 powers and resources to perform hereunder. Any such successor
20 shall be approved by the Court after notice to all parties and an
21 opportunity for hearing.

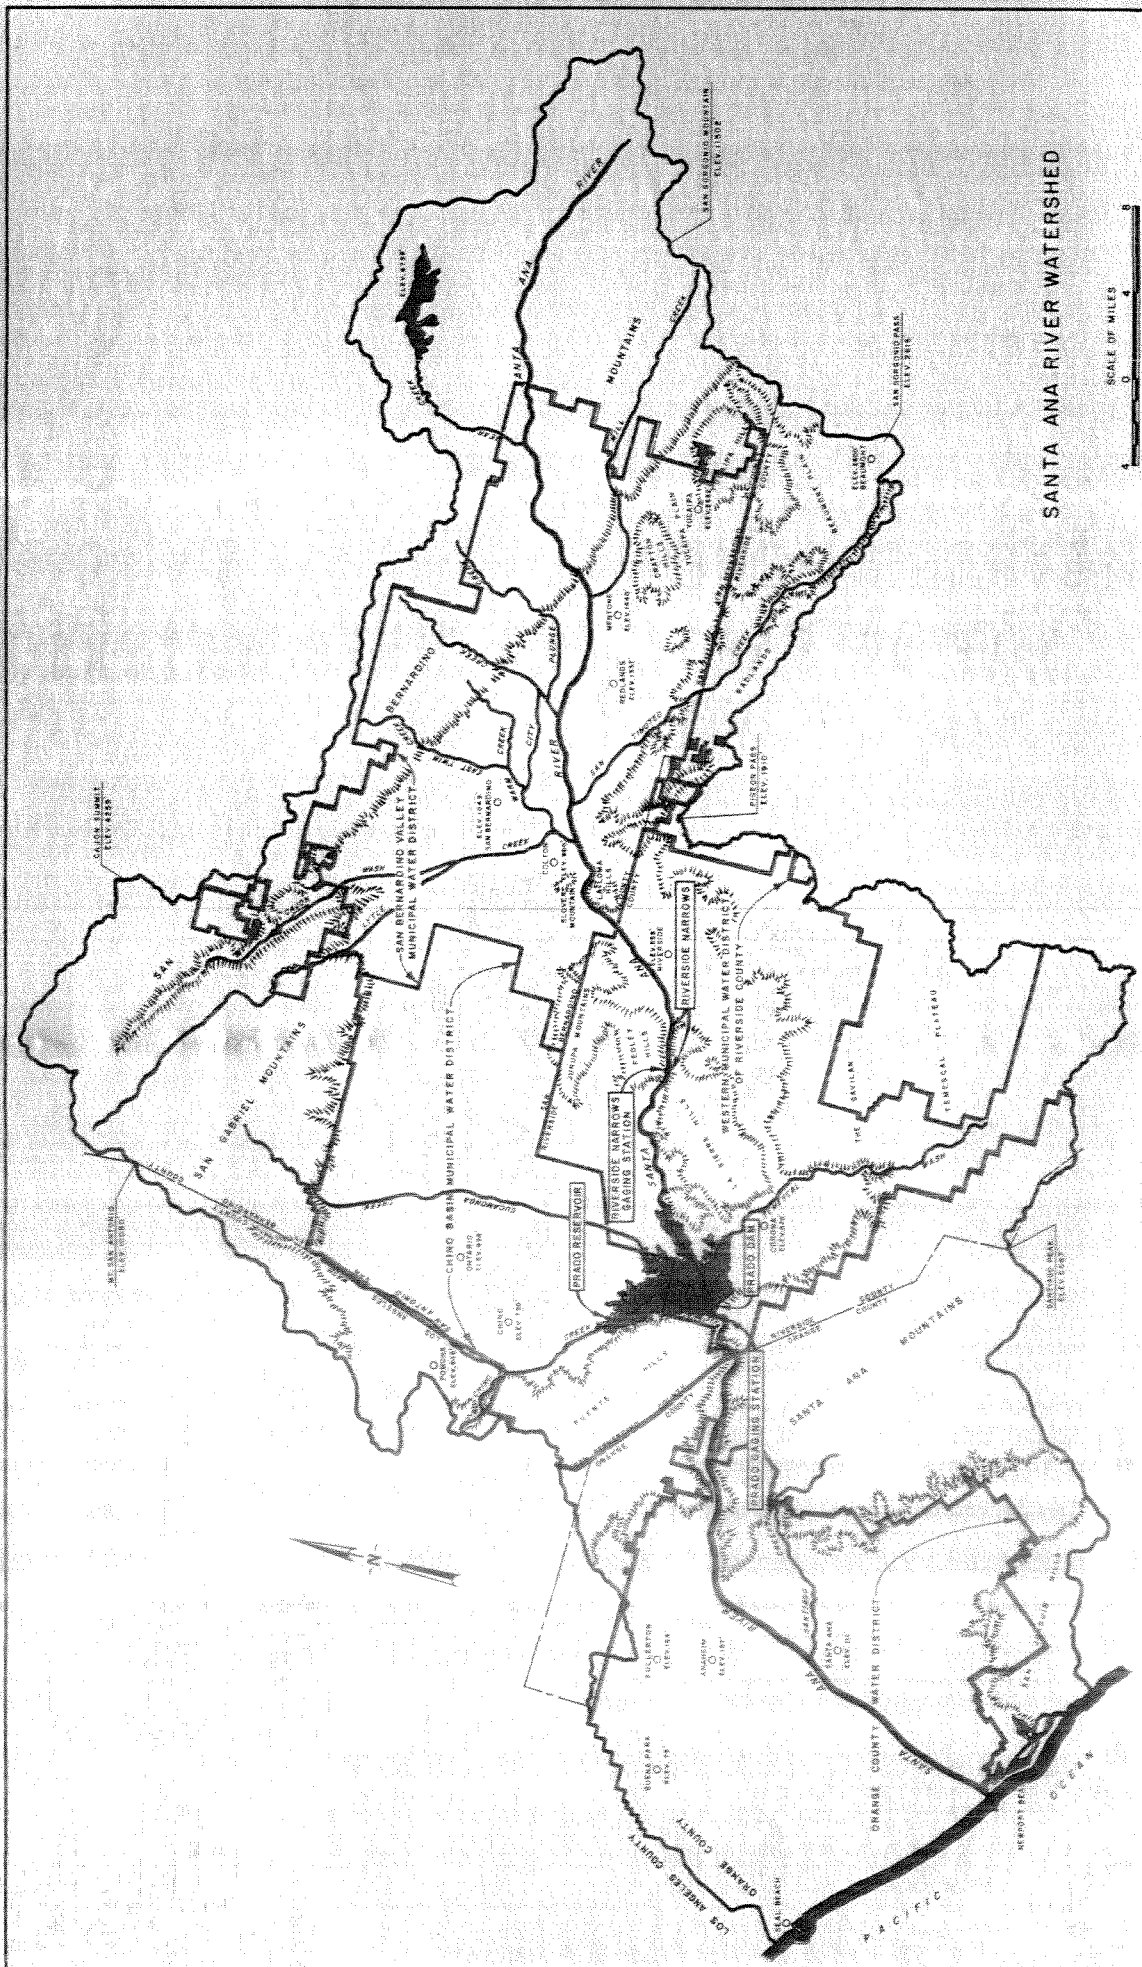

22 11. Future Actions. In the event that any Lower Area
23 claimant shall in the future obtain from any court of competent
24 jurisdiction a decree awarding to such claimant a right to receive
25 a stated amount of water from the Upper Area for use in the Lower
26 Area, any water delivered pursuant to such decree shall be consid-
27 ered as part of Base Flow. In the event that the relief obtained
28 by any such claimant is in the form of a restriction imposed upon
29 production and the use of water in Upper Area, rather than a right
30 to receive a stated amount of water, then notwithstanding the
31 proviso in Paragraph 8, any Upper District may apply to the Court
32 to modify the physical solution herein.

12. Costs. None of the parties shall recover any costs from any other party.

Dated: April 17, 1969

Judge

MAP OF SANTA ANA RIVER WATERSHED

SANTA ANA RIVER WATERSHED

ENGINEERING APPENDIX

ENGINEERING APPENDIX

The purpose of the Engineering Appendix is to establish the basis for measurements, calculations and determinations required in the operation of the physical solution.

1. Measurements.

In administering the physical solution, it will be necessary to determine the quantity and quality of stream flow and flow in pipelines or other conveyance facilities at several points along the Santa Ana River. Watermaster shall make, or obtain from United States Geological Survey (USGS), flood control districts or other entities, all measurements necessary for making the determinations required by the Judgment.

a. Change in Measuring Device or Location.

If any measuring device used or useful in making such determinations is inoperative, abandoned, changed or moved, Watermaster shall estimate the quantity that would have been measured at the station had it been operative at its original location, or may use a substitute device or location.

b. Erroneous Measurement. If Watermaster determines there is an error in any measurement or record, he may utilize his estimate in lieu of said measurement or record.

c. Preliminary Records. Watermaster may utilize preliminary records of measurement. If revisions are subsequently made in the records, Watermaster may reflect such changes in subsequent accounting.

2. Determination of Flow Components.

Since the records available only provide data on the total quantity of surface flow and since storm runoff occurs during and following periods of rainfall, Watermaster must determine what portion of total measured surface flow at Prado and at Riverside

1 Narrows is Storm Flow and what portion is Base Flow.

2 Under paragraph 3(k) of the Judgment, certain categories of
3 water are to be included or excluded from Base Flow. As such
4 waters may or may not be measured by the USGS gages at Prado and/or
5 Riverside Narrows, Watermaster must make appropriate adjustments to
6 account for the same.

7 The parties, in reaching the physical solution provided for
8 in the Judgment, used certain procedures to separate or scalp the
9 Storm Flow from the total measured surface flow and to determine
10 Base Flow. These procedures are reflected in the Work Papers of
11 the engineers, bound copies of which shall be filed with the Water-
12 master. Watermaster shall use either the same procedures or pro-
13 cedures which will give equivalent results, giving due considera-
14 tion to all sources of the surface flow measured at the gages, to
15 changes in the amounts and the proportionate contributions of each
16 source, and to changes in location of measuring points.

17 3. Water Quality Determinations.

18 It will be necessary to determine for each water year the
19 weighted average Total Dissolved Solids (TDS) content of the Base
20 Flow at Riverside Narrows and of the total flow at Prado.

21 TDS shall be determined by the method set forth under "B.
22 Filterable Residual", starting on page 245 of Standard Methods for
23 Examination of Water and Wastewater, Twelfth Edition, 1965, Library
24 of Congress Catalog Card No. 55-1979. The drying temperature shall
25 be 180° centigrade. Milligrams per liter (mg/l) shall be deemed
26 equivalent to parts per million (ppm) for purposes of the Judgment.

27 a. Procedure at Prado.

28 (1) Determinations of the electrical
29 conductivity at 25°C. near the gaging sta-
30 tion at Prado shall be made or obtained.

31 (2) A sufficient number of determinations
32 of TDS of the flow at the same point shall be

1 made or obtained to provide the relationship
2 between TDS and electrical conductivity for
3 all rates of flow. This relationship shall be
4 used to determine the average daily TDS weighted
5 by flow, for each day of the year. During periods
6 of Storm Flow, samples shall be taken at least
7 daily.

8 (3) The annual weighted average TDS of
9 all waters passing Prado shall be determined.
10 Any direct deliveries or flows which are in-
11 cluded or excluded in the definition of Base
12 Flow as set forth in paragraph 3(k) of the Judg-
13 ment, shall be similarly included or excluded in
14 the calculation of the annual weighted average
15 TDS.

16 b. Procedure at Riverside Narrows. The proced-
17 ure to adjust Base Flow at Riverside Narrows shall
18 be the same as that outlined in paragraph a. above,
19 except that the annual weighted average TDS of Base
20 Flow only is to be determined. Therefore during
21 periods of Storm Flow, the TDS of Base Flow shall
22 be estimated.

23 4. Accounting.

24 Utilizing the appropriate obligations set forth in the
25 Judgment and the measurements, calculations and determinations
26 described in this Engineering Appendix, Watermaster shall maintain
27 a continuing account for each year of the following items.

28 a. Prado Accounting.

29 (1) Base Flow at Prado. See Paragraph 2
30 of this Engineering Appendix and Paragraph 3(k)
31 of the Judgment.

- 1 (2) Annual Weighted TDS of Total Flow
2 at Prado. See Paragraph 3a of this Engineer-
3 ing Appendix.
- 4 (3) Annual Adjusted Base Flow. See Para-
5 graph 5(c) (2) of the Judgment and items (1)
6 and (2) above.
- 7 (4) Cumulative Adjusted Base Flow. This
8 is the cumulation of quantities shown in item (3)
9 above.
- 10 (5) Cumulative Entitlement of OCWD at Prado.
11 This is the product of 42,000 acre feet multi-
12 plied by the number of years after October 1,
13 1970.
- 14 (6) Cumulative Credit or Debit. This is
15 item (4) minus item (5).
- 16 (7) One-third of Cumulative Debit. This is
17 equal to one-third of any cumulative debit shown
18 in item (6) above.
- 19 (8) Minimum Required Base Flow in Follow-
20 ing Year. This is the minimum quantity of Base
21 Flow at Prado which CBMWD and WMWD must jointly
22 cause to occur in the following year determined
23 in accordance with paragraph 5(c) (1) of the
24 Judgment and utilizing item (7) above.
- 25 b. Riverside Narrows Accounting.
- 26 (1) Base Flow at Riverside Narrows.
27 See Paragraph 2 of this Engineering Appendix
28 and Paragraph 3(k) of the Judgment.
- 29 (2) Annual Weighted TDS of Base Flow at
30 Riverside Narrows. See Paragraph 3b of this
31 Engineering Appendix.
- 32 (3) Annual Adjusted Base Flow. See

1 Paragraph 5(b)(2) of the Judgment and items
2 (1) and (2) above.

3 (4) Cumulative Adjusted Base Flow. This is
4 the cumulation of quantities shown in item (3)
5 above.

6 (5) Cumulative Entitlement of CBMWD and
7 WMWD at Riverside Narrows. This is the product
8 of 15,250 acre feet multiplied by the number of
9 years after October 1, 1970.

10 (6) Cumulative Credit or Debit. This is
11 item (4) minus item (5).

12 (7) One-third of Cumulative Debit. This
13 is equal to one-third of any cumulative debit
14 shown in item (6) above.

15 (8) Minimum Required Base Flow in Follow-
16 ing Year. This is the minimum quantity of
17 Base Flow at Riverside Narrows which SBVMWD
18 must cause to occur in the following year deter-
19 mined in accordance with Paragraph 5(b)(1) of
20 the Judgment and utilizing item (7) above.

APPOINTING

WATERMASTER

25 CITY OF CHINO, et al.,

26 Cross-Complainants,

27 vs.

28 CITY OF ANAHEIM, et al.,

29 Cross-Defendants.

30 Section 7 of the Judgment herein providing for the appoint-
31 ment of a Watermaster, consisting of a committee composed of five
32 persons, one of which to be nominated each by Chino Basin Municipi-
pal Water District, Western Municipal Water District, San Bernar-
dino Valley Municipal Water District, and two by the Orange County
Water District; and

Such districts having made the following nominations in
accordance with such provision:

1 Chino Basin Municipal
2 Water District WILLIAM J. CARROLL,
3 Western Municipal Water
4 District ALBERT A. WEBB,
5 San Bernardino Valley
6 Municipal Water District CLINTON HENNING,
7 Orange County Water
8 District JOHN M. TOUPS,
9 MAX BOOKMAN,
10 and GOOD CAUSE APPEARING THEREFOR;
11 IT HEREBY IS ORDERED that the following representatives to
12 the Watermaster Committee are appointed and will serve at the
13 pleasure of and until further order of this court, for the purpose
14 of exercising the powers and duties of the Watermaster provided in
15 Section 7 of such Judgment:

16 WILLIAM J. CARROLL
17 ALBERT A. WEBB

**SAN BERNARDINO VALLEY MUNICIPAL
WATER DISTRICT DOCUMENTS**

**AGREEMENT WITH
CITY OF SAN BERNARDINO**

RESOLUTION NO. 9753

A RESOLUTION OF THE HON. MAYOR AND COMMON COUNCIL OF THE CITY OF SAN BERNARDINO AUTHORIZING THE EXECUTION OF AN AGREEMENT BY AND BETWEEN THE SAN BERNARDINO VALLEY MUNICIPAL WATER DISTRICT AND THE CITY OF SAN BERNARDINO, A MUNICIPAL CORPORATION, ESTABLISHING TERMS AND PROVISIONS RELATIVE TO OVERALL SETTLEMENT OF WATER RIGHTS IN THE SANTA ANA RIVER SYSTEM

BE IT RESOLVED BY THE HON. MAYOR AND COMMON COUNCIL OF THE CITY OF SAN BERNARDINO AS FOLLOWS:

SECTION ONE: That the City of San Bernardino execute an agreement by and between the San Bernardino Valley Municipal Water District and the City of San Bernardino, a municipal corporation, establishing terms and provisions relative to overall settlement of water rights in the Santa Ana River System.

SECTION TWO: That said agreement referred to herein, a copy of which is attached hereto and marked Exhibit "A", and made a part hereof as fully as though set out at length herein, is hereby approved.

SECTION THREE: That the Mayor of the City of San Bernardino is authorized to execute said agreement on behalf of said City of San Bernardino.

I HEREBY CERTIFY that the foregoing Resolution was duly adopted by the Mayor and Common Council of the City of San Bernardino at a ^{regular} meeting thereof held on the 14th day of April, 1969, by the following vote, to-wit:

AYES: Bayman, Lugo, Serrano, Fagan, Katone,
Finley, Gudin, Grogan, Alquist

NOES: None

ABSENT: None

Jack T. Felton
City Clerk

The foregoing Resolution is hereby approved this 15th day of April, 1969.

Al C. Ballantyne
Mayor of the City of San Bernardino

STATE OF CALIFORNIA)
COUNTY OF SAN BERNARDINO) ss.
CITY OF SAN BERNARDINO)

I, Jack T. Felton, City Clerk in and for the City of San Bernardino, California, hereby certify that the foregoing Resolution No. 9753, is a full, true and correct copy of that now on file in this office.

IN WITNESS WHEREOF, I have hereunto set my hand and Official Seal of the City of San Bernardino this 15th day of April, 1969.

Jack T. Felton
City Clerk

(SEAL)

1 into an over-all settlement of water rights in the Santa Ana River
2 System with ORANGE COUNTY WATER DISTRICT and the other major municipi-
3 pal districts in the watershed; The Western Municipal Water District
4 of Riverside County and Chino Basin Municipal Water District; and

5 WHEREAS, VALLEY DISTRICT recognizes the injustice and
6 lack of equity existing in a situation where the CITY'S pumping with-
7 in said VALLEY DISTRICT has been curtailed and the CITY has been pre-
8 vented in developing its water rights by pumping, although most other
9 water users within VALLEY DISTRICT were not so limited; and

10 WHEREAS, the cooperation of said CITY is essential to the
11 settlement with the major districts hereinabove mentioned; and

12 WHEREAS, it is essential to said settlement that the CITY
13 continue its present method of discharging effluent.

14 NOW, THEREFORE, in consideration of the terms, covenants
15 and agreements to be kept and performed by each of the parties here-
16 to, IT IS AGREED AS FOLLOWS:

17 1. That the term "Prescriptive Water Right" as applied
18 herein (with respect to the water rights of the CITY), shall refer
19 to the CITY'S prescriptive right as of January 1, 1969, which would
20 include the prescriptive right of the CITY as it was recognized in
21 Action No. 484,671 and as it existed on January 1, 1964, and all
22 rights or beneficial interests therein acquired--by agreement, pur-
23 chase, or otherwise, and any right to produce water for land sup-
24 plied by the CITY under a claim of overlying right, EXCEPTING ONLY
25 those specific rights acquired by the CITY, specified in Appendix
26 "A", attached hereto, and also EXCEPTING those leasehold rights tem-
27 porarily acquired by the CITY. Those rights so excepted are rights
28 which the City possesses in addition to its prescriptive right.

29 2. In the event:

30 (a) there shall be a determination by any
31 court or water agency with jurisdiction
32 to limit taking of water that the CITY'S

1 prescriptive water right is an amount
2 less than 22,000 acre feet; or
3 (b) there shall be any determination for
4 purposes of delivery of supplemental
5 water by VALLEY DISTRICT that the
6 prescriptive water right of CITY is
7 less than 22,000 acre feet;
8 then VALLEY DISTRICT agrees to import, for the account of CITY, and
9 supply to the ground water resources from which CITY'S wells take
10 water, at no cost to CITY, water on the basis of 1 acre foot for
11 every 2 acre feet of water discharged by said CITY in the form of
12 effluent, up to the amount of the difference between:
13 (a) 22,000 acre feet per year;
14 and
15 (b) the amount to which the CITY shall be
16 limited, or, if there is no limitation,
17 which shall be recognized in the
18 determination.
19 3. If the CITY transfers or otherwise disposes of the
20 water rights that make up the prescriptive right, then the 22,000
21 acre-foot figure hereinabove referred to shall be reduced by the
22 same amount that the CITY disposes of in such sale or transfer.
23 Transfer to a successor water agency charged with the responsibil-
24 ity of providing water to the citizens of the CITY, however, shall
25 not be deemed a "Transfer" within the meaning of this section,
26 and such water rights shall continue to be included in the total.

27 -----
28 -----
29 -----
30 -----
31 -----
32 -----

1 4. Any proceedings instituted in the hereinabove-
2 mentioned Action No. 84671 shall constitute a determination
3 within the meaning of Paragraph "2", above, if--and only if--
4 such proceedings hereafter impose a limitation upon the taking
5 of water by the CITY.

6 5. Said water to be imported for said CITY by VALLEY
7 DISTRICT under this Agreement shall be of unfiltered, untreated
8 water, of domestic quality. Delivery of said imported water by
9 VALLEY DISTRICT to the CITY may be surface delivery by mutual
10 agreement, and at such points and under such conditions as may be
11 determined by mutual agreement.

12 6. VIYY agrees to continue to discharge from its sewage
13 plants to the stream bed of the Santa Ana River at least 16,000
14 acre feet of effluent each year in the manner presently being done
15 for the use and benefit of VALLEY DISTRICT in meeting its obliga-
16 tions under any agreement with downstream interests. Such ef-
17 fluent shall not be of a lesser quality than will meet the present
18 requirements of the Santa Ana River Regional Water Quality Control
19 Board. Any effluent discharged under this provision shall be
20 counted in computing VALLEY DISTRICT'S obligation under Paragraph
21 "2", hereinabove.

22 7. Any additional effluent generated by the CITY
23 is not covered by this Agreement, except that any such effluent
24 which reaches the stream bed of the Santa Ana River shall not
25 be of a lesser quality than will meet the present requirements
26 of the Santa Ana River Basin Regional Water Quality Control
27 Board.

28 8. In the event the ORANGE COUNTY WATER DISTRICT
29 should seek enforcement, in any way whatsoever, of the
30 Judgment existing in Action No. 84671, the DISTRICT agrees
31 to defend said CITY and hold the CITY harmless from any
32 cost or expenses, of any nature, connected to or in any way

1 related with the attempted enforcement of such action.

2 9. There is in existence a JOINT POWERS AGREEMENT
3 dated May 26, 1959, as amended, between the DISTRICT and the
4 CITY. In connection with that Agreement, the DISTRICT has
5 maintained a pumping plant and pipeline. Said JOINT POWERS
6 AGREEMENT is hereby terminated and, pursuant to its provisions,
7 the CITY is entitled to possession of all of said pumping
8 plants, pipelines, and appurtenances.

9 IN WITNESS WHEREOF, each public agency has caused
10 this instrument to be executed by its respective officials
11 theretofore duly authorized by the legislative body thereof.

AGREEMENT

THIS AGREEMENT, made and entered into at San Bernardino, California, this 20th day of June, 1972, by and between SAN BERNARDINO VALLEY MUNICIPAL WATER DISTRICT, organized and existing under the Municipal Water District Act of 1911, as amended (hereinafter called "VALLEY DISTRICT"), and the CITY OF COLTON, a municipal corporation (hereinafter designated as "CITY"),

WITNESSETH:

WHEREAS, VALLEY DISTRICT was organized and is existing to secure a water supply for lands within its boundaries, which said supply shall, in part, be furnished pursuant to a contract between VALLEY DISTRICT and the STATE OF CALIFORNIA DEPARTMENT OF WATER RESOURCES, which said contract bears the date of December 30, 1960, as amended November 15, 1963, September 28, 1964, June 26, 1968, December 31, 1969, December 31, 1970; and December 27, 1971, and

WHEREAS, the City is located within the boundaries of VALLEY DISTRICT and has secured a water supply by means of wells and surface diversions, and is currently delivering the same to landowners within the CITY; and

WHEREAS, CITY'S prescriptive rights have been limited to 4,412 acre feet annually by court order, Superior Court of the State of California, County of San Bernardino, entitled: "ORANGE COUNTY WATER DISTRICT v. CITY OF RIVERSIDE, et al., " No. 84671; and

WHEREAS, said restriction on pumping was arrived at in Action 84671 by limiting the CITY to the highest total quantity of water which it had produced for the five consecutive years preceding the filing of the Complaint in that action; and

WHEREAS, VALLEY DISTRICT has now entered into an over-all settlement of water rights in the Santa Ana River System with ORANGE COUNTY WATER DISTRICT and the other major municipal districts in the watershed; the Western Municipal Water District in Riverside County and Chino Basin Municipal Water District; and

WHEREAS, VALLEY DISTRICT recognized the injustice and lack of equity existing in a situation where the CITY'S pumping within said VALLEY DISTRICT has been curtailed and the CITY has been prevented in developing its water rights by pumping; although most other water users within VALLEY DISTRICT were not so limited; and

WHEREAS, VALLEY DISTRICT declared its willingness to enter into an agreement with said CITY at the time of settlement with the major districts hereinabove mentioned; and

WHEREAS, it is desirable under the terms of said settlement that the CITY continue its present method of discharging effluent.

NOW, THEREFORE, in consideration of the terms, covenants and agreements to be kept and performed by each of the parties hereto, IT IS AGREED AS FOLLOWS:

1. That the term "prescriptive Water Right" as applied herein (with respect to the water rights of the CITY), shall refer to the CITY'S prescriptive right as of January 1, 1969, which would include the prescriptive right of the CITY as it was recognized in Action No. 84671 and as it existed on January 1, 1964, and all rights or beneficial interests therein acquired -- by agreement, purchase or otherwise, and any right to produce water for land supplied by the CITY under a claim of overlying right, and the Barnhill Well right, EXCEPTING ONLY those specific rights acquired by the CITY, specified in Appendix "A", attached hereto, and also EXCEPTING those leasehold rights temporarily acquired by the CITY. Those rights so excepted are

rights which the City possesses in addition to its prescriptive right.

2. In the event:

(a) there shall be a determination by any court or water agency with jurisdiction to limit taking of water that the CITY'S prescriptive water right is an amount less than 4,800 acre feet; or

(b) There shall be any determination for purposes of delivery of supplemental water by VALLEY DISTRICT that the prescriptive water right of CITY is less than 4,800 acre feet;

then VALLEY DISTRICT agrees to import, for the account of CITY, and supply to the ground water resources from which CITY'S wells take water, at no cost to CITY, water on the basis of 1 acre foot for every 2 acre feet of water discharged by said CITY in the form of effluent for irrigation use on lands overlying the Rialto-Colton Basin or directly into the Santa Ana River, up to the amount of the difference between:

(a) 4,800 acre feet per year;

and

(b) the amount to which the CITY shall be limited, or, if there is no limitation, which shall be recognized in the determination.

3. If the CITY transfers or otherwise disposes of the water rights that make up the prescriptive right, then the 4,800 acre-foot figure hereinabove referred to shall be reduced by the same amount

that the CITY disposes of in such sale or transfer. Transfer to a successor water agency charged with the responsibility of providing water to the citizens of the CITY, however, shall not be deemed a "Transfer" within the meaning of this section, and such water rights shall continue to be included in the total.

4. Any proceedings instituted in the hereinabove-mentioned Action No. 84671 shall constitute a determination within the meaning of Paragraph "2", above, if--and only if--such proceedings hereafter impose a limitation upon the taking of water by the CITY.

5. Said water to be imported for said CITY by VALLEY DISTRICT under this Agreement shall be of unfiltered, untreated water, of domestic quality. Delivery of said imported water by VALLEY DISTRICT to the CITY may be surface delivered by mutual agreement, and at such points and under such conditions as may be determined by mutual agreement.

6. CITY agrees to continue to discharge from its sewage works into the stream bed of the Santa Ana River or for irrigation use on the adjoining land overlying the Colton Basin at least 2,450 acre feet of effluent each year in the manner presently being done for the use and benefit of VALLEY DISTRICT in meeting its obligations under any agreement with downstream interests. Such effluent shall not be of a lesser quality than will meet the present requirements of the Santa Ana River Regional Water Quality Control Board. Any effluent discharged under this provision shall be counted in computing VALLEY DISTRICT'S obligation under Paragraph "2", hereinabove.

7. Any additional effluent generated by the CITY is not covered by this Agreement, except that any such effluent which reaches the stream bed of the Santa Ana River shall not be of a lesser quality than will meet the present requirements of the Santa Ana River

Basin Regional Water Quality Control Board.

8. In the event the ORANGE COUNTY WATER DISTRICT should seek enforcement, in any way whatsoever, of the Judgment existing in Action No. 84671, the DISTRICT agrees to defend said CITY and hold the CITY harmless from any cost or expenses, of any nature, connected to or in any way related with the attempted enforcement of such action.

IN WITNESS WHEREOF, each public agency has caused this instrument to be executed by its respective officials theretofore duly authorized by the legislative body thereof.

WESTERN MUNICIPAL DOCUMENTS

AGREEMENTS

AGREEMENT WITH
CHINO BASIN MUNICIPAL WATER DISTRICT

CBMWD -- WMWD AGREEMENT
RE SATISFACTION OF JOINT OBLIGATION
PRADO SETTLEMENT

THIS AGREEMENT is made and entered into as of this
2nd day of October, 1968, by and between CHINO
BASIN MUNICIPAL WATER DISTRICT (herein called "CBMWD") and
WESTERN MUNICIPAL WATER DISTRICT OF RIVERSIDE COUNTY (here-
in called "WMWD").

RECITALS

(a) Concurrently with the execution of this agree-
ment, a stipulation for judgment has been executed termina-
ting the stream system adjudication in the matter of Orange
County Water District v. City of Chino, et al., Orange County
Superior Court No. 117628 (herein called the "Case"). Said
stipulated judgment includes a physical solution whereby
CBMWD and WMWD undertake an obligation to assure a certain
Base Flow at Prado, subject to appropriate adjustments. Said
physical solution is herein called the "Prado Settlement".

(b) The obligation of CBMWD and WMWD under the Prado
Settlement for the delivery of Base Flow at Prado is a joint
obligation, the risks of which will be minimized by the
guarantee by each party to this agreement that it will de-
liver certain quantities of water to the river above Prado.
CBMWD's contribution will enter the river from the north
out of Chino Ground Water Basin and WMWD's contribution will

enter from the east through Riverside Narrows and from the south out of Corona Basin.

(c) It is the purpose of this agreement to define and specify the rights and obligations of the parties, inter se, insofar as satisfaction of said joint obligation under the Prado Settlement is concerned.

COVENANTS

NOW THEREFORE, IN CONSIDERATION of the premises and of the covenants hereinafter contained, the parties agree as follows:

1. Definitions. All terms specially defined in said stipulated judgment in the Case are used in this agreement in the context of said judgment. In addition, the following terms shall have the meanings herein set forth:

a. Primary Contribution -- refers to the obligation of each party hereto to cause to be delivered to the Santa Ana River, or vicinity, a quantity of water as hereinafter set forth. Such Primary Contribution shall not include the rising water at Riverside Narrows, underflow from Chino or Corona Ground Water Basins, or the quantity of effluent from the Jurupa Community Services District sewage treatment plant.

b. Adjusted Primary Contribution -- refers to the Primary Contribution actually delivered,

adjusted for quality pursuant to paragraph 3a,
3b and 3c hereof.

c. Place names -- shall refer to locations
as shown on the map entitled "Santa Ana River,
Riverside Narrows to Prado", attached hereto as
Exhibit A.

2. Source and Nature of Primary Contributions. It
is presently contemplated that the source of Primary Con-
tributions will be effluent from municipal sewage treat-
ment facilities within each district's corporate boundaries.
In the case of CBMWD, it is intended that said water will
include effluent from the treatment facilities serving the
cities of Ontario, Upland, Fontana, Montclair and Chino, and
Cucamonga County Water District, as well as any new municipal
sewage treatment facilities which may hereafter be estab-
lished within CBMWD. In the case of WMWD, said water will
include effluent from the sewage treatment facilities serv-
ing the cities of Riverside and Corona. Supplemental, non-
tributary waters may be delivered as a part of Primary
Contribution, as well as waters from other sources such as
ground water. In the event CBMWD finds it necessary during
the first ten (10) years of operation of this agreement to
produce ground water to make up a portion of its Primary
Contribution, such production shall only be from wells lo-
cated above the line shown on Exhibit "A" as "Pumping

Boundary". WMWD shall not produce ground water during said period for said purpose from wells located north of the Santa Ana River. After October 1, 1980, ground water shall not constitute a part of the Primary Contribution of either party hereto. Water deliveries in order to qualify as Primary Contribution shall be made in a manner and at a time which would allow said waters to qualify as Base Flow under said Prado Settlement.

3. Obligation for Primary Contributions and Quality Adjustment in Measurement Thereof. In any Water Year, each of the parties hereto shall be obligated, to the extent necessary to satisfy their joint obligation under the Prado Settlement, to deliver a Primary Contribution of 16,875 acre feet of Adjusted Primary Contribution. The quantity of Primary Contribution delivered during any year shall be subject to adjustment based on the weighted average annual TDS of all flows included therein, as follows:

a. CBMWD's Adjusted Primary Contribution

shall be derived by the following formula:

<u>Weighted Average TDS in PPM</u>	<u>Formula for Adjusted Primary Contribution</u>
Greater than 800	$Q - \frac{17.5}{16,875} Q \text{ (TDS-800)}$
700 - 800	Q
Less than 700	$Q + \frac{17.5}{16,875} Q \text{ (700-TDS)}$

b. WAND's Adjusted Primary Contribution
shall be the sum of the Adjusted Primary Contribution from Riverside Narrows and Corona Basin, derived pursuant to the following formulae:

(1) Riverside Narrows

<u>Weighted Average TDS in PPM</u>	<u>Formula for Adjusted Primary Contribution</u>
Greater than 800	$Q - \frac{16}{15,250} Q \text{ (TDS-800)}$
700 - 800	Q
Less than 700	$Q + \frac{16}{15,250} Q \text{ (700-TDS)}$

(2) Corona Basin

<u>Weighted Average TDS in PPM</u>	<u>Formula for Adjusted Primary Contribution</u>
Greater than 1200	$Q - \frac{1.5}{1,625} Q \text{ (TDS-1200)}$
700 - 1200	Q
Less than 700	$Q + \frac{1.5}{1,625} Q \text{ (700-TDS)}$

Where: Q = Primary Contribution actually delivered.

4. Measurements and Measuring Devices. The method and point of delivery of Primary Contribution by each of the parties shall be specified by written addenda to this agreement and the necessary and agreed measuring devices

and facilities shall be installed at the expense of the party whose Primary Contribution is being so measured. Measurements shall be taken and records thereof maintained by the Management Committee administering this agreement.

5. Accounting. A continuing account shall be maintained by the Management Committee, which account shall reflect the Adjusted Primary Contribution, and the accumulated debit or credit of each party derived from its accumulated Primary Contribution obligation and the Adjusted Primary Contribution delivered. A summary report of the annual accounting hereunder shall be filed, for information purposes, with the Watermaster appointed in the Case. To the extent that accumulated credits or accumulated debits of the parties are equal, the Management Committee may, from time to time, reduce said cumulative data to zero for simplicity of accounting.

6. Obligation in Event of Shortage Under Prado Settlement. In the event there is an obligation to deliver water to OCWD under the Prado Settlement, water delivered for such purpose shall be credited as a portion of Primary Obligation to the account of any party delivering or causing the same to be delivered. Shortages shall be made up as follows:

(a) To the extent that either party has an accumulated debit under the accounting for

Primary Contributions in excess of that of the other party, said accumulated debit shall be first made up by the deficient party before any make-up obligation is incurred to OCWD by the other party.

(b) To the extent that either party has an accumulated credit under the accounting for Primary Contributions in excess of that of the other party, such excess credit may be applied toward satisfaction of such party's share of any obligation to OCWD under the Prado Settlement, except in the case of an obligation resulting from failure to deliver the minimum annual quantities required under said Prado Settlement. In the event any substantial inequities should arise as a result of excessive accumulation of credits based on deliveries of poor quality water, appropriate adjustments shall be made by the parties.

(c) With the exception of the adjustments under subparagraphs (a) and (b) hereof, contributions of make-up water shall be equal.

7. Management Committee. CBMWD and WMWD shall each designate two representatives to a management committee for purposes of maintenance of accounts, ordering of make-up water, billings and related operational problems under

this agreement. Decisions of such committee shall be unanimous or the issues which cannot be thus resolved shall be submitted to arbitration.

8. Arbitration. In event of a dispute as to the construction, interpretation or implementation of this agreement or an inability of the Management Committee to make a unanimous decision in the administration of this agreement, the issues in dispute or matter requiring action shall be submitted to binding arbitration. For such purpose an agreed arbitrator shall be selected, or in absence of agreement each party shall select an arbitrator and they shall select a third. Said arbitrator or three arbitrators acting as a board, shall take such evidence and make such investigation as seems appropriate and shall render a written decision on the matter in question. Decisions in the arbitration shall be binding on the parties and may be enforced by the court in the Case.

9. Modification. In the event the Prado Settlement is modified by the Court under its continuing jurisdiction, it is contemplated that appropriate adjustments, if they are required, will be made by amendment to this agreement. To the extent that such modification cannot be obtained by mutual agreement, the Court in the Case shall have the power, as an incident to its continuing jurisdiction, to modify this agreement correspondingly.

10. Effective Date. The effective date of this agreement shall be October 1, 1970, and all obligations and accountings hereunder shall commence as of said date.

11. Filing of Agreement. This agreement and all addenda thereto, and amendments and modifications thereof, shall be filed in the Case.

IN WITNESS WHEREOF the parties hereto have caused this agreement to be executed as of the day and date first above written.

AGREEMENT

RIVERSIDE COUNTY FLOOD CONTROL

MEMORANDUM OF AGREEMENT AMONG WESTERN MUNICIPAL WATER DISTRICT
OF RIVERSIDE COUNTY, CHINO BASIN MUNICIPAL WATER DISTRICT,
COUNTY OF RIVERSIDE, AND RIVERSIDE COUNTY FLOOD CONTROL AND
WATER CONSERVATION DISTRICT RESPECTING STORAGE OF WATER FOR
RECREATIONAL PURPOSES.

The Western Municipal Water District of Riverside
County (hereinafter called "WMWD"), the Chino Basin Municipal
Water District (hereinafter called "CBMWD"), the County of
Riverside (hereinafter called "the County") and the Riverside
County Flood Control and Water Conservation District (hereinafter
called "Flood Control") agree as follows:

RECITALS

1. WMWD and CBMWD have negotiated a proposed
stipulated judgment with the Orange County Water District and the
San Bernardino Valley Municipal Water District in the action
entitled Orange County Water District v. City of Chino, et al.,
Orange County Superior Court No. 117628, the effectiveness of which
depends, among other things, on (a) the County and Flood Control
signing a "Stipulation and Order re Dismissal of Certain Defendants"
in said action assenting to the terms of said judgment and (b)
Flood Control assigning its Water Right Application 21700 for
storage of water in Prado Reservoir to the Orange County Water
District.

2. The County and Flood Control desire to cooperate
with WMWD, CBMWD and all other parties to said action in bringing
it to a conclusion as proposed in said stipulated judgment, but

also wish to make some provision for the storage of water in Prado Reservoir for public recreational purposes.

3. WMWD and CBMWD recognize that said stipulated judgment does not preclude reasonable beneficial use of water on overlying and riparian lands in Prado Reservoir and upstream therefrom.

AGREEMENT

IT IS HEREBY AGREED by and between WMWD, CBMWD, the County and Flood Control as follows:

1. The County and Flood Control shall sign the "Stipulation and Order re Dismissal of Certain Defendants" in the action entitled Orange County Water District v. City of Chino, et al., Orange County Superior Court No. 117628.

2. Flood Control shall assign its Water Right Application 21700 to the Orange County Water District.

3. In the event County or Flood Control shall, on or after January 1, 1974 and before January 1, 1984, construct or establish any recreational lakes within Prado Reservoir, WMWD and CBMWD agree that they will not object to or oppose, directly or indirectly, the use of up to 10,000 acre feet of water, which otherwise would constitute Base Flow at Prado under such stipulated judgment, for the purpose of the initial filling of any such lake or lakes.

4. This Agreement may be assigned by County or Flood Control to any other public agency, including any joint powers agency of which either is a member, but shall not otherwise be assigned without the written consent of WMWD and CBMWD.

5. WMWD and CBMWD shall have the right to enter upon any lands which may be acquired by County or Flood Control within Prado Reservoir below elevation 514' for the purpose of eliminating phreatophytes and pumping water to produce Base Flow, provided that any such activity or use does not interfere with any use of the property by County or Flood Control.

CITY OF RIVERSIDE

AGREEMENT BETWEEN
WESTERN MUNICIPAL WATER DISTRICT OF RIVERSIDE COUNTY
AND CITY OF RIVERSIDE IN REGARD TO
PRADO SETTLEMENT.

AGREEMENT made this 20th day of November, 1968,
between WESTERN MUNICIPAL WATER DISTRICT OF RIVERSIDE COUNTY,
a public agency, hereinafter called Western, and the CITY OF
RIVERSIDE, a municipal corporation, hereinafter called Riverside.

RECITALS

(a) A settlement has been negotiated terminating the
stream system adjudication in the case of Orange County Water
District v. City of Chino, et al., Orange County Superior Court
No. 117628. This settlement, hereinafter called the "Prado
Settlement," provides for a physical solution whereby certain
Base Flows are jointly assured by Western and the Chino Basin
Municipal Water District (Chino hereinafter) at Prado, and by
the San Bernardino Valley Municipal Water District (San
Bernardino hereinafter) at Riverside Narrows.

(b) As part of the Prado Settlement all defendants,
except for the three municipal water districts mentioned above,
will be dismissed from the suit without pumping restrictions.
The judgment in the first Orange County suit, the Irvine
Decree, and certain other restrictions in the area above Prado
will also be set aside so long as such Settlement is carried out.

(c) In order to implement the Prado Settlement, and subject to final Court approval thereof, Western and Chino have further agreed between themselves as to the responsibility of each District for contributions to the flow at Prado.

(d) The primary purpose of this agreement is to provide for the commitment to Western and the Prado Settlement of certain quantities of Riverside sewage effluent.

(e) All terms specially defined in the Prado Settlement documents, and in the agreement between Western and Chino, are herein used in the context of such documents.

In consideration of the mutual covenants of the parties, and of the assumption by Western of the obligations imposed by the Prado Settlement, IT IS HEREBY AGREED AS FOLLOWS:

1. Contribution. Riverside shall be obligated to discharge annually to the Santa Ana River in the vicinity of Riverside Narrows 15,250 acre feet of effluent from its sewage treatment plant, adjusted for quality as hereinafter provided, and subject to the conditions of Paragraphs 5 and 8.

2. Quality Adjustment. The quantity of effluent actually delivered in any year shall be adjusted for quality in accordance with the following formula. The amount which results from the application of such formula shall constitute Riverside's "adjusted contribution", and such adjusted contribution shall be used to determine the City's compliance with its obligations hereunder.

As used in the formula, TDS means the weighted average annual total dissolved solids in the effluent for the year in question.

<u>Weighted Average TDS in ppm</u>	<u>Formula for Determining Adjusted Contribution</u>
Greater than 800	$Q - \frac{16}{15,250} Q \text{ (TDS-800)}$
700 - 800	Q
Less than 700	$Q + \frac{16}{15,250} Q \text{ (700-TDS)}$

Where Q = the amount of effluent actually delivered.

3. Effective Date. Riverside's commitment of such effluent shall be effective October 1, 1970, and is contingent upon final Court approval of the Prado Settlement.

4. Measurements. Both the quantity and quality of the effluent discharged hereunder shall be measured and determined in such manner as to meet the requirements of the Prado Settlement and of Western's agreement with Chino. The point of measurement for quantity and quality shall be at Riverside's sewage treatment plant measuring flume. The cost of installing and maintaining any new measurement devices which may be required, and of obtaining necessary water quality analyses, shall be borne by Western. Records shall be kept of all such measurements and determinations, and these shall be available to both parties.

5. Use of Credits. If Riverside delivers more effluent than is required under this Agreement, it may in any given year reduce its adjusted contribution by the amount of such excess deliveries, but in no event shall Riverside's adjusted contribution be less than 13,420 acre feet each year. However, if the minimum obligation under the Prado Settlement is lowered to 34,000 acre feet, then the amount of 13,420 in this paragraph shall be reduced to 12,420 acre feet.

6. Modification of Prado Settlement. In the event the Prado Settlement is modified by the Court under its continuing jurisdiction and the obligation of Western is affected thereby, or in the event of modification of the Western-Chino Agreement, appropriate adjustments if required shall be made in this agreement; provided that the unadjusted amount of 15,250 shall not be subject to increase.

7. Right of First Refusal. If Riverside proposes to sell, lease or otherwise transfer title to any of its sewage effluent not committed hereunder, Western shall have the right of first refusal to acquire such effluent.

8. Pumping Limitation, In the event Riverside should be required to reduce its pumping from any portion of the Santa Ana system, without replenishment being provided by Western, or without similar limitations being imposed upon all other substantial pumpers and diverters taking water for use within Western, Riverside shall have the right to withdraw up to 3000 acre feet annually, on a non-cumulative basis, from the effluent

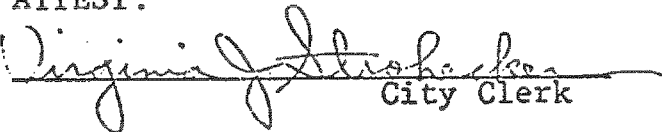

commitment made herein; provided that such effluent is used to offset the reduction in pumping; or in the alternative, it shall have the right to offset such reduction by increasing its pumping elsewhere in the river system up to a maximum of 3000 acre feet per year without liability to Western for any pump tax on account of such increase.

CITY OF CORONA

AGREEMENT BETWEEN
WESTERN MUNICIPAL WATER DISTRICT OF RIVERSIDE COUNTY
AND CITY OF CORONA IN REGARD TO
PRADO SETTLEMENT

AGREEMENT made this 18th day of December,
1968, between WESTERN MUNICIPAL WATER DISTRICT OF RIVERSIDE
COUNTY, a public agency, hereinafter called WESTERN, and
the CITY OF CORONA, a municipal corporation, hereinafter
called CORONA.

RECITALS

A. A settlement has been negotiated terminating the
stream system adjudication in the case of Orange County Water
District v. City of Chino, et al., Orange County Superior
Court No. 117628. This settlement, hereinafter called the
"Prado Settlement," provides for a physical solution whereby
certain Base Flows are jointly assured by Western and the
Chino Basin Municipal Water District (Chino hereinafter) at
Prado, and by the San Bernardino Valley Municipal Water
District (San Bernardino hereinafter) at Riverside Narrows.

B. As part of the Prado Settlement all defendants,
except for the three municipal water districts mentioned above,
will be dismissed from the suit without pumping restrictions.
The judgment in the first Orange County suit, the Irvine
Decree, and certain other restrictions in the area above
Prado will also be set aside so long as such Settlement is
carried out.

C. In order to implement the Prado Settlement, and
subject to final Court approval thereof, Western and Chino

have further agreed between themselves as to the responsibility of each District for contributions to the flow at Prado.

D. The primary purpose of this agreement is to provide for the commitment to Western and the Prado Settlement of certain quantities of Corona sewage effluent.

E. All terms specially defined in the Prado Settlement documents, and in the agreement between Western and Chino, are herein used in the context of such documents.

In consideration of the mutual covenants of the parties, and of the assumption by Western of the obligations imposed by the Prado Settlement, IT IS HEREBY AGREED AS FOLLOWS:

1. Contribution. Corona shall be obligated to discharge annually to the Santa Ana River at the point of measurement as designated pursuant to Paragraph 4 hereof 1625 acre feet of effluent from its sewage treatment plant, adjusted for quality as hereinafter provided, and subject to the conditions of Paragraphs 4, 5 and 7.

2. Quality Adjustment. The quantity of effluent actually delivered in any year shall be adjusted for quality in accordance with the following formula. The amount which results from the application of such formula shall constitute Corona's "adjusted contribution," and such adjusted contribution shall be used to determine the

City's compliance with its obligations hereunder. As used in the formula, TDS means the weighted average annual total dissolved solids in the effluent for the year in question.

<u>Weighted Average TDS in ppm</u>	<u>Formula for Determining Adjusted Contribution</u>
Greater than 1200	$Q - \frac{1.5}{1,625} Q \text{ (TDS-1200)}$
700 - 1200	Q
Less than 700	$Q + \frac{1.5}{1,625} Q \text{ (700-TDS)}$

Where Q = the amount of effluent actually delivered.

3. Effective Date. Corona's commitment of such effluent shall be effective October 1, 1970, and is contingent upon final Court approval of the Prado Settlement.

4. Measurements. Both the quantity and quality of effluent discharged hereunder shall be measured and determined in such manner as to meet the requirements of the Prado Settlement and of Western's agreement with Chino. The point of measurement for quantity and quality shall be at its discharge from Corona's sewage treatment plant, or such point further downstream as the City may designate. If Corona is required by law or otherwise to discharge said effluent at a point other than so designated by Corona, in order to comply with its obligations hereunder or under the Prado Settlement, Western will bear any and all costs incurred by Corona i

discharging and enabling it to so discharge at such point; or in the alternative, Western shall release Corona from all of its obligations hereunder. The cost of installing and maintaining any new measurement devices which may be required, and of obtaining necessary water quality analyses, shall be borne by Western. Records shall be kept of all such measurements and determinations, and these shall be available to both parties.

5. Use of Credits. If Corona delivers more effluent than is required under this Agreement, it may in any given year reduce its adjusted contribution by the amount of such excess deliveries, but in no event shall Corona's adjusted contribution be less than 1430 acre feet each year. However, if the minimum obligation under the Prado Settlement is lowered to 34,000 acre feet, then the amount of 1430 in this paragraph shall be reduced to 1330 acre feet.

6. Modification of Prado Settlement. In the event the Prado Settlement is modified by the Court under its continuing jurisdiction and the obligation of Western is affected thereby, or in the event of modification of the Western-Chino Agreement, appropriate adjustments if required shall be made in this agreement; provided that the unadjusted amount of 1625 shall not be subject to increase.

7. Pumping Limitation. In the event Corona should be required to reduce its pumping from any portion of the

Santa Ana system, without replenishment being provided by Western, or without similar limitations being imposed upon all other substantial pumpers and diverters taking water for use within Western, Corona shall have the right to withdraw up to 325 acre feet annually, on a noncumulative basis, from the effluent commitment made herein; provided that such effluent is used to offset the reduction in pumping; or in the alternative, it shall have the right to offset such reduction by increasing its pumping elsewhere in the river system up to a maximum of 325 acre feet per year without liability to Western for any pump tax on account of such increase.

STIPULATION FOR JUDGMENT

The undersigned, as counsel for the indicated parties in
the above-entitled action, hereby stipulate and agree as
follows:

(1) That judgment, substantially in the form
attached hereto as Exhibit "A", may be entered by
the Court herein.

(2) That the limitation periods specified in
Sections 581 and 583 of the Code of Civil Procedure
are by this stipulation extended to and including
the date hereof.

therefor,

IT IS HEREBY ORDERED, ADJUDGED AND DECREED as follows:

I

ACTIVE PARTIES

(a) The parties to this Judgment are as follows:

(1) Plaintiff Western Municipal Water District of Riverside County, a California municipal water district, herein often called "Western", appearing and acting pursuant to Section 71751 of the Water Code;

(2) Plaintiff City of Riverside, a municipal corporation;

(3) Plaintiffs Riverside Highland Water Company, Agua Mansa Water Company and Meeks & Daley Water Company, each of which is a mutual water company and a California corporation;

(4) Plaintiff The Regents of the University of California, a California public corporation;

(5) Defendant San Bernardino Valley Municipal Water District, a California municipal water district, herein often called "San Bernardino Valley", appearing and acting pursuant to Section 71751 of the Water Code;

(b) This Judgment shall inure to the benefit of, and be binding upon, the successors and assigns of the parties.

II

DISMISSED PARTIES

All parties other than those named in the preceding Paragraph I are dismissed without prejudice.

III
PRIOR JUDGMENTS

(a) The Judgment dated and entered on May 13, 1959, in that certain action filed in the Superior Court of the State of California in and for the County of San Bernardino, entitled and numbered "San Bernardino Valley Water Conservation District, a State Agency, Plaintiff v. Riverside Water Company, a corporation, et al., Defendants", No. 97031, is superseded effective January 1, 1971, and for so long as this Judgment remains in effect as to any party hereto that was a party to that action, and as to any party hereto that is a successor in interest to the rights determined in that action.

(b) The Judgment dated June 23, 1965, and entered on April 21, 1966, in that certain action filed in the Superior Court of the State of California in and for the County of San Bernardino entitled and numbered "San Bernardino Valley Water Conservation District, a State Agency, Plaintiff, v. Riverside Water Company, a corporation, et al., Defendants," No. 111614, is superseded effective January 1, 1971, and for so long as this Judgment remains in effect as to any party hereto that was a party to that action, and as to any party hereto that is a successor in interest to any rights determined in that action.

(c) As used in this Paragraph III only, "party" includes any person or entity which stipulates with the parties hereto to accept this Judgment.

IV

DEFINITIONS

The following ground water basins and tributary areas are situated within the Santa Ana River watershed upstream from Riverside Narrows and are tributary thereto, and their approximate locations and boundaries for purposes of this Judgment are shown upon the map attached hereto as Appendix "A"; San Bernardino Basin Area (the area above Bunker Hill Dike, but excluding certain mountainous regions and the Yucaipa, San Timoteo, Oak Glen and Beaumont Basins); Colton Basin Area, Riverside Basin Area within San Bernardino County, and Riverside Basin Area within Riverside County.

As used herein the following terms shall have the meanings herein set forth:

(a) Bunker Hill Dike - The San Jacinto Fault, located approximately as shown on Appendix "A", and forming the principal downstream boundary of the San Bernardino Basin Area.

(b) Riverside Narrows - That bedrock narrows in the Santa Ana River indicated on Appendix "A".

(c) Extractions - Any form of the verb or noun shall include pumping, diverting, taking or withdrawing water, either surface or subsurface, by any means whatsoever, except extractions for hydroelectric generation to the extent that such flows are returned to the stream, and except for diversions for replenishment.

(d) Natural Precipitation - Precipitation which falls naturally in the Santa Ana River watershed.

(e) Imported Water - Water brought into the Santa Ana River watershed from sources of origin outside such watershed.

1 (f) Replenishment - Artificial recharge of the
2 ground water body achieved through the spreading or retention of
3 water for the purpose of causing it to percolate and join the
4 underlying ground water body, or injection of water into the
5 ground water resources by means of wells; provided that as used
6 with reference to any obligation of Western to replenish the
7 Riverside Basin Area in Riverside County, the term replenishment
8 shall include any water caused to be delivered by Western for
9 which credit is received by San Bernardino Valley against its
10 obligation under the Orange County Judgment to provide base
11 flow at Riverside Narrows.

12 (g) Safe Yield - Safe yield is that maximum
13 average annual amount of water that could be extracted from the
14 surface and subsurface water resources of an area over a period
15 of time sufficiently long to represent or approximate long-time
16 mean climatological conditions, with a given areal pattern of
17 extractions, under a particular set of physical conditions or
18 structures as such affect the net recharge to the ground water
19 body, and with a given amount of usable underground storage
20 capacity, without resulting in long-term, progressive lowering
21 of ground water levels or other undesirable result. In
22 determining the operational criteria to avoid such adverse
23 results, consideration shall be given to maintenance of adequate
24 ground water quality, subsurface outflow, costs of pumping,
25 and other relevant factors.

26 The amount of safe yield is dependent in part upon
27 the amount of water which can be stored in and used from the
28 ground water reservoir over a period of normal water supply
29 under a given set of conditions. Safe yield is thus related to
30 factors which influence or control ground water recharge, and
31
32

1 to the amount of storage space available to carry over recharge
2 occurring in years of above average supply to years of
3 deficient supply. Recharge, in turn, depends on the available
4 surface water supply and the factors influencing the
5 percolation of that supply to the water table.

6 Safe yield shall be determined in part through the
7 evaluation of the average net groundwater recharge which would
8 occur if the culture of the safe yield year had existed over
9 a period of normal native supply.

10 (h) Natural Safe Yield - That portion of the safe
11 yield of the San Bernardino Basin Area which could be derived
12 solely from natural precipitation in the absence of imported
13 water and the return flows therefrom, and without
14 contributions from new conservation. If in the future any
15 natural runoff tributary to the San Bernardino Basin Area is
16 diverted away from that Basin Area so that it is not included
17 in the calculation of natural safe yield, any replacement made
18 thereof by San Bernardino Valley or entities within it from
19 imported water shall be included in such calculation.

20 (i) New Conservation - Any increase in
21 replenishment from natural precipitation which results from
22 operation of works and facilities not now in existence, other
23 than those works installed and operations which may be
24 initiated to offset losses caused by increased flood control
25 channelization.

26 (j) Year - A calendar year from January 1 through
27 December 31. The term "annual" shall refer to the same period
28 of time.

29 (k) Orange County Judgment - The final judgment
30 in Orange County Water District v. City of Chino, et al.,
31 Orange County Superior Court No. 117628, as it may from time to
32

time be modified.

(l) Return Flow - That portion of the water applied for use in any particular ground water basin which subsequently reaches the ground water body in that basin.

(m) Five Year Period - a period of five consecutive years.

V

EXTRACTIONS FROM THE SAN BERNARDINO BASIN AREA

(a) For Use by Plaintiffs. The average annual extractions from the San Bernardino Basin Area delivered for use in each service area by each Plaintiff for the five year period ending with 1963 are hereby determined to be as set forth in Table B-1 of Appendix "B". The amount for each such Plaintiff delivered for use in each service area as set forth in Table B-1 shall be designated, for purposes of this Judgment, as its "base right" for such service area.

(b) For Use by Others. The total actual average annual extractions from the San Bernardino Basin Area by entities other than Plaintiffs for use within San Bernardino County for the five year period ending with 1963 are assumed to be 165,407 acre feet; the correct figure shall be determined by the Watermaster as herein provided.

VI

SAN BERNARDINO BASIN AREA RIGHTS AND REPLENISHMENT

(a) Determination of Natural Safe Yield. The natural safe yield of the San Bernardino Basin Area shall be computed by the Watermaster, reported to and determined initially by supplemental order of this Court, and thereafter

1 shall be subject to the continuing jurisdiction thereof.

2 (b) Annual Adjusted Rights of Plaintiffs.

3 1. The annual "adjusted right" of each
4 Plaintiff to extract water from the San Bernardino
5 Basin Area for use in each service area designated
6 in Table B-1 shall be equal to the sum of the
7 following:

8 (a) its base right for such service area, until
9 the natural safe yield of the San Bernardino Basin
10 Area is determined, and thereafter its percentage
11 of such natural safe yield determined by the
12 methods used in Table B-2; and (b) an equal
13 percentage for each service area of any new
14 conservation, provided the conditions of the
15 subparagraph 2 below have been met.

16 2. In order that the annual adjusted
17 right of each such Plaintiff shall include its
18 same respective percentage of any new conservation,
19 such Plaintiff shall pay its proportionate share
20 of the costs thereof. Each Plaintiff shall have
21 the right to participate in new conservation projects,
22 under procedures to be determined by the Watermaster
23 for notice to Plaintiffs of the planned construction
24 of such projects. With respect to any new
25 conservation brought about by Federal installations,
26 the term "costs" as used herein shall refer to any
27 local share required to be paid in connection with
28 such project. Each Plaintiff shall make its
29 payment at times satisfactory to the constructing
30 agency, and new conservation shall be credited to
31 any participating Plaintiff as such conservation is
32 effected.

1 3. In any five year period, each
2 Plaintiff shall have the right to extract from the
3 San Bernardino Basin Area for use in each service
4 area designated in Table B-1 an amount of water
5 equal to five times its adjusted right for such
6 service area; provided, however, that extractions by
7 each Plaintiff in any year in any service area shall
8 not exceed such Plaintiff's adjusted right for that
9 service area by more than 30 percent.

10 4. If the natural safe yield of the
11 San Bernardino Basin Area has not been determined by
12 January 1, 1972, the initial determination thereof
13 shall be retroactive to that date and the rights
14 of the Plaintiffs, and the replenishment
15 obligation of San Bernardino Valley as hereinafter
16 set forth, shall be adjusted as of such date. Any
17 excess extractions by Plaintiffs shall be charged
18 against their respective adjusted rights over the
19 next five year period, or in the alternative,
20 Plaintiffs may pay to San Bernardino Valley the
21 full cost of any replenishment which it has pro-
22 vided as replenishment for such excess extractions.
23 Any obligation upon San Bernardino Valley to pro-
24 vide additional replenishment, by virtue of such
25 retroactive determination of natural safe yield,
26 may also be discharged over such next five year
27 period.

28 5. Plaintiffs and each of them and
29 their agents and assigns are enjoined from extracting
30 any more water from the San Bernardino Basin Area than
31 is permitted under this Judgment. Changes in place
32

1 of use of any such water from one service area to
2 another shall not be made without the prior
3 approval of Court upon a finding of compliance
4 with Paragraph XV(b) of this Judgment. So long
5 as San Bernardino Valley is in compliance with all
6 its obligations hereunder, and Plaintiffs are
7 allowed to extract the water provided for in this
8 Judgment, Plaintiffs are further enjoined from
9 bringing any action to limit the water extracted
10 from the San Bernardino Basin Area for use within
11 San Bernardino Valley.

12 6. Nothing in this Judgment shall
13 prevent future agreements between San Bernardino
14 Valley and Western under which additional
15 extractions may be made from the San Bernardino Basin
16 Area, subject to the availability of imported water
17 not required by San Bernardino Valley, and subject
18 to payment satisfactory to San Bernardino Valley
19 for replenishment required to compensate for such
20 additional extractions.

21
22 (c) San Bernardino Valley Replenishment. San
23 Bernardino Valley shall provide imported water for
24 replenishment of the San Bernardino Basin Area at least equal
25 to the amount by which extractions therefrom for use within
26 San Bernardino County exceed during any five year period the
27 sum of: (a) five times the total average annual extractions
28 determined under Paragraph V(b) hereof, adjusted as may be
29 required by the natural safe yield of the San Bernardino Basin
30 Area; and (b) any new conservation to which users within San
31 Bernardino Valley are entitled. Such replenishment shall be

1 supplied in the year following any five year period; provided
2 that during the first five year period, San Bernardino Valley
3 shall supply annual amounts on account of its obligations
4 hereunder, and such amounts shall be not less than fifty
5 percent of the gross amount of excess extractions in the
6 previous year.

7 1. Against its replenishment obligation
8 over any five year period San Bernardino Valley shall
9 receive credit for that portion of such excess
10 extractions that returns to the ground water of the
11 San Bernardino Basin Area.

12 2. San Bernardino Valley shall also
13 receive credit against any future replenishment
14 obligations for all replenishment which it provides
15 in excess of that required herein, and for any
16 amounts which may be extracted without replenishment
17 obligation, which in fact are not extracted.

18 (d) In this subparagraph (d), "person" and "entity"
19 mean only those persons and entities, and their successors
20 in interest, which have stipulated with the parties to this
21 Judgment within six months after its entry to accept this
22 Judgment.

23 San Bernardino Valley agrees that the base rights of
24 persons or entities other than Plaintiffs to extract water
25 from the San Bernardino Basin Area for use within San
26 Bernardino Valley will be determined by the average annual
27 quantity extracted by such person or entity during the five
28 year period ending with 1963. After the natural safe yield
29 of the San Bernardino Basin Area is determined hereunder, such
30
31
32

1 base rights will be adjusted to such natural safe yield; the
2 adjusted right of each such person or entity shall be that
3 percentage of natural safe yield as determined hereunder from
4 time to time which the unadjusted right of such person or
5 entity is of the amount determined under Paragraph V(b).

6 San Bernardino Valley further agrees that in the
7 event the right to extract water of any of such persons or
8 entities in the San Bernardino Basin Area is adjudicated and
9 legal restrictions placed on such extractions which prevent
10 extracting of water by said persons or entities in an amount
11 equal to their base rights, or after natural safe yield is
12 determined, their adjusted rights, San Bernardino Valley will
13 furnish to such persons or entities or recharge the ground
14 water resources in the area of extraction for their benefit
15 with imported water, without direct charge to such persons or
16 entities therefor, so that the base rights, or adjusted
17 rights, as the case may be, may be taken by the person or
18 entity.

19 Under the provisions hereof relating to furnishing
20 of such water by San Bernardino Valley, such persons or
21 entities shall be entitled to extract in addition to their
22 base rights or adjusted rights any quantities of water spread
23 for repumping in their area of extractions, which has been
24 delivered to them by a mutual water company under base rights
25 or adjusted base rights included by the Watermaster under the
26 provisions of Paragraph V (b) hereof. Extractions must be
27 made within three years of spreading to so qualify.
28
29
30
31
32

VII

WATER DISCHARGED ACROSS THE BUNKER HILL DIKE

San Bernardino Valley shall keep in force an agreement with the City of San Bernardino that the present annual quantity of municipal sewage effluent discharged across Bunker Hill Dike, assumed for all purposes herein to be 16,000 acre feet annually, shall be committed to the discharge of the downstream obligations imposed on San Bernardino Valley under this Judgment or under the Orange County Judgment, and that such effluent shall comply with the requirements of the Santa Ana River Basin Regional Water Quality Control Board in effect December 31, 1968.

VIII

EXTRACTIONS FROM COLTON BASIN AREA AND RIVERSIDE
BASIN AREA IN SAN BERNARDINO COUNTY.

(a) The average annual extractions from the Colton Basin Area and that portion of the Riverside Basin Area within San Bernardino County, for use outside San Bernardino Valley, for the five year period ending with 1963 are assumed to be 3,349 acre feet and 20,191 acre feet, respectively; the correct figures shall be determined by the Watermaster as herein provided.

(b) Over any five year period, there may be extracted from each such Basin Area for use outside San Bernardino Valley, without replenishment obligation, an amount equal to five times such annual average for the Basin Area; provided, however, that if extractions in any year exceed such average by more than 20 percent, Western shall provide replenishment in the following year equal to the excess

1 extractions over such 20 percent peaking allowance.

2 (c). To the extent that extractions from each such
3 Basin Area for use outside San Bernardino Valley exceed the
4 amounts specified in the next preceding Paragraph (b), Western
5 shall provide replenishment. Except for any extractions in
6 excess of the 20 percent peaking allowance, such replenishment
7 shall be supplied in the year following any five year period,
8 and shall not be from reclaimed water produced within San
9 Bernardino Valley. Such replenishment shall also be of a
10 quality at least equal to the water extracted from the Basin
11 Area being recharged; provided, that water from the State Water
12 Project shall be deemed to be of acceptable quality.
13 Replenishment shall be supplied to the Basin Area from which
14 any excess extractions have occurred and in the vicinity of
15 the place of the excess extractions to the extent required to
16 preclude influence on the water level in the three wells below
17 designated; provided that discharge of imported water into the
18 Santa Ana River or Warm Creek from a connection on the State
19 Aqueduct near the confluence thereof, if released in accordance
20 with a schedule approved by the Watermaster to achieve
21 compliance with the objectives of this Judgment, shall satisfy
22 any obligation of Western to provide replenishment in the Colton
23 Basin Area, or that portion of the Riverside Basin Area in San
24 Bernardino County, or the Riverside Basin Area in Riverside
25 County.

26 (d) Extractions from the Colton Basin Area and that
27 portion of the Riverside Basin Area within San Bernardino County,
28 for use within San Bernardino Valley, shall not be limited.
29 However, except for any required replenishment by Western,
30 San Bernardino Valley shall provide the water to maintain the
31 static water levels in the area, as determined by wells numbered
32

1 1S 4W 21 Q3, 1S 4W 29 H1, and 1S 4W 29 Q1 at an average level
2 no lower than that which existed in the Fall season of 1963.
3 Such 1963 average water level is hereby determined to be 822.04
4 feet above sea level. In future years, the level shall be
5 computed by averaging the lowest static water levels in each
6 of the three wells occurring at or about the same time of the
7 year, provided that no measurements will be used which reflect
8 the undue influence of pumping in nearby wells, or in the
9 three wells, or pumping from the Riverside Basin in Riverside
10 County in excess of that determined pursuant to Paragraph IX(a)
11 hereof.

12 (e) Extractions by Plaintiffs from the Colton Basin
13 Area and the portion of the Riverside Basin Area in San
14 Bernardino County may be transferred to the San Bernardino
15 Basin Area if the level specified in Paragraph (d) above is
16 not maintained, but only to the extent necessary to restore
17 such 1963 average water level, provided that Western is not
18 in default in any of its replenishment obligations. San
19 Bernardino Valley shall be required to replenish the San
20 Bernardino Basin Area in an amount equal to any extractions so
21 transferred. San Bernardino Valley shall be relieved of
22 responsibility toward the maintenance of such 1963 average water
23 level to the extent that Plaintiffs have physical facilities
24 available to accommodate such transfers of extractions, and
25 insofar as such transfers can be legally accomplished.

26 (f) The Colton Basin Area and the portion of the
27 Riverside Basin Area in San Bernardino County constitute a major
28 source of water supply for lands and inhabitants in both San
29 Bernardino Valley and Western, and the parties hereto have a
30 mutual interest in the maintenance of water quality in these
31 Basin Areas and in the preservation of such supply. If
32

1 the water quality in such Areas, as monitored by the City of
2 Riverside wells along the river, falls below the Objectives set
3 therefor by the Santa Ana River Basin Regional Water Quality
4 Control Board, the Court shall have jurisdiction to modify the
5 obligations of San Bernardino Valley to include, in addition
6 to its obligation to maintain the average 1963 water level,
7 reasonable provisions for the maintenance of such water quality.

8 (g) The primary objectives of Paragraph VIII and
9 related provisions are to allow maximum flexibility to San
10 Bernardino Valley in the operation of a coordinated
11 replenishment and management program, both above and below
12 Bunker Hill Dike; to protect San Bernardino Valley against
13 increased extractions in the area between Bunker Hill Dike and
14 Riverside Narrows, which without adequate provision for
15 replenishment might adversely affect base flow at Riverside
16 Narrows, for which it is responsible under the Orange County
17 Judgment; and to protect the area as a major source of ground
18 water supply available to satisfy the historic extractions
19 therefrom for use within Western, without regard to the method
20 of operation which may be adopted by San Bernardino Valley for
21 the San Bernardino Basin Area, and without regard to the effect
22 of such operation upon the historic supply to the area below
23 Bunker Hill Dike.

24 If these provisions should prove either inequitable or
25 unworkable, the Court upon the application of any party hereto
26 shall retain jurisdiction to modify this Judgment so as to
27 regulate the area between Bunker Hill Dike and Riverside Narrows
28 on a safe yield basis; provided that under such method of
29 operation, (1) base rights shall be determined on the basis of
30 total average annual extractions for use within San Bernardino
31 Valley and Western, respectively, for the five year period ending
32

1 with 1963; (2) such base rights for use in both Districts shall
2 be subject to whatever adjustment may be required by the safe
3 yield of the area, and in the aggregate shall not be exceeded
4 unless replenishment therefor is provided; (3) in calculating
5 safe yield, the outflow from the area at Riverside Narrows shall
6 be determined insofar as practical by the base flow obligations
7 imposed on San Bernardino Valley under the Orange County
8 Judgment; and (4) San Bernardino Valley shall be required to
9 provide replenishment for any deficiency between the actual
10 outflow and the outflow obligation across Bunker Hill Dike as
11 established by safe yield analysis using the base period of
12 1934 through 1960.

13
14 IX

15 EXTRACTIONS FROM THE PORTION OF RIVERSIDE BASIN AREA
16 IN RIVERSIDE COUNTY WHICH IS TRIBUTARY TO RIVERSIDE NARROWS.

17 (a) The average annual extractions from the portion
18 of the Riverside Basin Area in Riverside County which is
19 tributary to Riverside Narrows, for use in Riverside County,
20 for the five year period ending with 1963 are assumed to be
21 30,044 acre feet; the correct figures shall be determined by
22 the Watermaster as herein provided.

23 (b) Over any five year period, there may be
24 extracted from such Basin Area, without replenishment
25 obligation, an amount equal to five times such annual average
26 for the Basin Area; provided, however, that if extractions in
27 any year exceed such average by more than 20 percent, Western
28 shall provide replenishment in the following year equal to the
29 excess extractions over such 20 percent peaking allowance.

30 (c) To the extent that extractions from such Basin
31 Area exceed the amounts specified in the next preceding
32

1 Paragraph (b), Western shall provide replenishment. Except
2 for any extractions in excess of the 20 percent peaking
3 allowance, such replenishment shall be supplied in the year
4 following any five year period, and shall be provided at or
5 above Riverside Narrows.

6 (d) Western shall also provide such replenishment
7 to offset any reduction in return flow now contributing to the
8 base flow at Riverside Narrows, which reduction in return
9 flow results from the conversion of agricultural uses of water
10 within Western to domestic or other uses connected to sewage
11 or waste disposal systems, the effluent from which is not
12 tributary to the rising water at Riverside Narrows.

13
14 X

15 REPLENISHMENT TO OFFSET NEW EXPORTS OF WATER TO AREAS
16 NOT TRIBUTARY TO RIVERSIDE NARROWS.

17 Certain average annual amounts of water extracted
18 from the San Bernardino Basin Area and the area downstream
19 therefrom to Riverside Narrows during the five year period
20 ending in 1963 have been exported for use outside of the area
21 tributary to Riverside Narrows and are assumed to be 50,667
22 acre feet annually as set forth in Table C-1 of Appendix "C";
23 the correct amount shall be determined by the Watermaster as
24 herein provided. Western shall be obligated to provide
25 replenishment at or above Riverside Narrows for any increase
26 over such exports by Western or entities within it from such
27 areas for use within areas not tributary to Riverside Narrows.
28 San Bernardino Valley shall be obligated to provide
29 replenishment for any increase over the exports from San
30 Bernardino Valley for use in any area not within Western nor
31 tributary to Riverside Narrows as set forth in Table C-2 of
32

1 Appendix. "C", such amounts being subject to correction by the
2 Watermaster, or for any exports from the San Bernardino Basin
3 Area for use in the Yucaipa, San Timoteo, Oak Glen and
4 Beaumont Basins.

5 XI

6 REPLENISHMENT CREDITS AND ADJUSTMENT FOR QUALITY
7

8 (a) All replenishment provided by Western under
9 Paragraph IX and all credits received against such
10 replenishment obligation shall be subject to the same adjustments
11 for water quality applicable to base flow at Riverside Narrows,
12 as set forth in the Orange County Judgment.

13 (b) Western shall receive credit against its
14 replenishment obligations incurred under this Judgment for the
15 following:

16 1. As against its replenishment obligation
17 under Paragraph VIII, any return flow to the Colton
18 Basin Area or the portion of the Riverside Basin Area
19 within San Bernardino County, respectively, resulting
20 from any excess extractions therefrom; and as
21 against its replenishment obligation under Paragraph
22 IX, any return flow to the portion of the Riverside
23 Basin Area in Riverside County, which contributes
24 to the base flow at Riverside Narrows, resulting
25 from any excess extractions therefrom, or from the
26 Riverside Basin Area in San Bernardino County, or
27 from the Colton Basin Area.

28 2. Subject to adjustment under
29 Paragraph (a) hereof, any increase over the present
30 amounts of sewage effluent discharged from
31

1 treatment plants within Riverside County which are
2 tributary to Riverside Narrows, and which results
3 from the use of imported water.

4 3. Any replenishment which may be pro-
5 vided in excess of that required; any amounts which
6 hereunder are allowed to be extracted from the
7 Colton and Riverside Basin Areas without
8 replenishment obligation by Western, and which in
9 fact are not extracted; any storm flows conserved
10 between Bunker Hill Dike and Riverside Narrows by
11 works financed solely by Western, or entities within
12 it, which would not otherwise contribute to base
13 flow at Riverside Narrows; and any return flow
14 from imported water used in Riverside County which
15 contributes to base flow at Riverside Narrows;
16 provided, however, that such use of the underground
17 storage capacity in each of the above situations
18 does not adversely affect San Bernardino Valley
19 in the discharge of its obligations at Riverside
20 Narrows under the Orange County Judgment, nor
21 interfere with the accomplishment by San Bernardino
22 Valley of the primary objectives of Paragraph VIII,
23 as stated in Subdivision (g).

24 (c) The replenishment obligations of Western under
25 this Judgment shall not apply during such times as amounts of
26 base flow at Riverside Narrows and the amounts of water stored
27 in the ground water resources below Bunker Hill Dike and
28 tributary to the maintenance of such flow are found by Order of
29 the Court to be sufficient to satisfy any obligation which
30 San Bernardino Valley may have under this Judgment, or under the
31

1 Orange County Judgment, and if the Court further finds by Order
2 that during such times any such increase in pumping, changes
3 in use or exports would not adversely affect San Bernardino
4 Valley in the future.

5 (d) The replenishment obligations of San Bernardino
6 Valley under Paragraph X of this Judgment for increase in
7 exports from the Colton and Riverside Basin Areas within San
8 Bernardino Valley below the Bunker Hill Dike shall not apply
9 during such times as the amounts of water in the ground water
10 resources of such area are found by Order of the Court to be
11 sufficient to satisfy the obligations which San Bernardino
12 Valley may have to Plaintiffs under this Judgment, and if the
13 Court further finds by Order that during such times any such
14 increases in exports would not adversely affect Plaintiffs in
15 the future.

16
17 XII

18 CONVEYANCE OF WATER BY SAN BERNARDINO VALLEY
19 TO RIVERSIDE NARROWS.

20 If San Bernardino Valley determines that it will
21 convey reclaimed sewage effluent, or other water, to or near
22 Riverside Narrows, to meet its obligations under this or the
23 Orange County Judgment, the City of Riverside shall make
24 available to San Bernardino Valley for that purpose any unused
25 capacity in the former Riverside Water Company canal, and the
26 Washington and Monroe Street storm drains, without cost except
27 for any alterations or capital improvements which may be
28 required, or any additional maintenance and operation costs which
29 may result. The use of those facilities shall be subject to the
30 requirements of the Santa Ana River Basin Regional Water Quality
31 Control Board and of the State Health Department, and compliance
32

1 therewith shall be San Bernardino Valley's responsibility.

2
3 XIII

4 WATERMASTER

5 (a) This Judgment and the instructions and
6 subsequent orders of this Court shall be administered and
7 enforced by a Watermaster. The parties hereto shall make such
8 measurements and furnish such information as the Watermaster
9 may reasonably require, and the Watermaster may verify such
10 measurements and information and obtain additional measurements
11 and information as the Watermaster may deem appropriate.

12 (b) The Watermaster shall consist of a committee
13 of two persons. San Bernardino Valley and Western shall each
14 have the right to nominate one of such persons. Each such
15 nomination shall be made in writing, served upon the other
16 parties to this Judgment, and filed in Court. Such person shall
17 be appointed by and serve at the pleasure of and until further
18 order of this Court. If either Western or San Bernardino Valley
19 shall at any time nominate a substitute appointee in place of
20 the last appointee to represent it, such appointee shall be
21 appointed by the Court in place of such last appointee.

22 (c) Appendix "D" to this Judgment contains some of
23 the data which have been used in preparation of this Judgment,
24 and shall be utilized by the Watermaster in connection with
25 any questions of interpretation.

26 (d) Each and every finding and determination of the
27 Watermaster shall be made in writing certified to be by
28 unanimous action of both members of the Watermaster committee.
29 In the event of failure or inability of such Watermaster
30 Committee to reach agreement, the Watermaster committee may
31 determine to submit the dispute to a third person to be selected
32

1 by them, or if they are unable to agree on a selection, to be
2 selected by the Court, in which case the decision of the third
3 person shall be binding on the parties; otherwise the fact,
4 issue, or determination in question shall forthwith be
5 certified to this Court by the Watermaster, and after due notice
6 to the parties and opportunity for hearing, said matter shall
7 be determined by order of this Court, which may refer the
8 matter for prior recommendation to the State Water Resources
9 Control Board. Such order of the Court shall be a determination
10 by the Watermaster within the meaning of this Judgment.

11 (e) The Watermaster shall report to the Court and
12 to each party hereto in writing not more than seven (7) months
13 after the end of each year, or within such other time as the
14 Court may fix, on each determination made by it pursuant to this
15 Judgment, and such other items as the parties may mutually
16 request or the Watermaster may deem to be appropriate. All of
17 the books and records of the Watermaster which are used in the
18 preparation of, or are relevant to, such reported data,
19 determinations and reports shall be open to inspection by the
20 parties hereto. At the request of any party this Court will
21 establish a procedure for the filing and hearing of objections
22 to the Watermaster's report.

23 (f) The fees, compensation and expenses of each
24 person on the Watermaster shall be borne by the District which
25 nominated such person. All other Watermaster service costs and
26 expenses shall be borne by San Bernardino Valley and Western
27 equally.

28 (g) The Watermaster shall initially compute and
29 report to the Court the natural safe yield of the San Bernardino
30 Basin Area, said computation to be based upon the cultural
31

1 conditions equivalent to those existing during the five
2 calendar year period ending with 1963.

3 (h) The Watermaster shall as soon as practical
4 determine the correct figures for Paragraphs V(b), VI(b)1,
5 VIII(a), IX(a) and X, as the basis for an appropriate
6 supplemental order of this Court.

7
8 XIV

9 CONTINUING JURISDICTION OF THE COURT

10 (a) The Court hereby reserves continuing
11 jurisdiction of the subject matter and parties to this Judgment,
12 and upon application of any party, or upon its own motion, may
13 review and redetermine, among other things, the following
14 matters and any matters incident thereto:

15 1. The hydrologic condition of any one or
16 all of the separate basins described in this Judgment in order
17 to determine from time to time the safe yield of the San
18 Bernardino Basin Area.

19 2. The desirability of appointing a
20 different Watermaster or a permanent neutral member of the
21 Watermaster, or of changing or more clearly defining the duties
22 of the Watermaster.

23 3. The desirability of providing for increases
24 or decreases in the extraction of any particular party because
25 of emergency requirements or in order that such party may
26 secure its proportionate share of its rights as determined
27 herein.

28 4. The adjusted rights of the Plaintiffs as
29 required to comply with the provisions hereof with respect to
30 changes in the natural safe yield of the San Bernardino Basin
31

1 Area. If such changes occur, the Court shall adjudge that the
2 adjusted rights and replenishment obligations of each party
3 shall be changed proportionately to the respective base rights.

4 5. Conforming the obligations of San
5 Bernardino Valley under this Judgment to the terms of any new
6 judgment hereafter entered adjudicating the water rights within
7 San Bernardino Valley, if inconsistencies of the two judgments
8 impose hardship on San Bernardino Valley.

9 6. Adjusting the figures in Paragraphs V(b),
10 VI(b) 1, VIII(a) IX(a), and X, to conform to determination
11 by the Watermaster.

12 7. Credit allowed for return flow in the San
13 Bernardino Basin Area if water levels therein drop to the point
14 of causing undue hardship upon any party.

15 8. Other matters not herein specifically set
16 forth which might occur in the future and which would be
17 of benefit to the parties in the utilization of the surface and
18 ground water supply described in this Judgment, and not
19 inconsistent with the respective rights of the parties as herein
20 established and determined.

21 (b) Any party may apply to the Court under its
22 continuing jurisdiction for any appropriate modification of
23 this Judgment if its presently available sources of imported
24 water are exhausted and it is unable to obtain additional
25 supplies of imported water at a reasonable cost, or if there is
26 any substantial delay in the delivery of imported water through
27 the State Water Project.

XV
SAVING CLAUSES

(a) Nothing in this Judgment precludes San Bernardino Valley, Western, or any other party from exercising such rights as it may have or obtain under law to spread, store underground and recapture imported water, provided that any such use of the underground storage capacity of the San Bernardino Basin Area by Western or any entity within it shall not interfere with any replenishment program of the Basin Area.

(b) Changes in the place and kind of water use, and in the transfer of rights to the use of water, may be made in the absence of injury to others or prejudice to the obligations of either San Bernardino Valley or Western under Judgment or the Orange County Judgment.

(c) If any Plaintiff shall desire to transfer all or any of its water rights to extract water within San Bernardino Valley to a person, firm, or corporation, public or private, who or which is not then bound by this Judgment, such Plaintiff shall as a condition to being discharged as hereinafter provided cause such transferee to appear in this action and file a valid and effective express assumption of the obligations imposed upon such Plaintiff under this Judgment as to such transferred water rights. Such appearance and assumption of obligation shall include the filing of a designation of the address to which shall be mailed all notices, requests, objections, reports and other papers permitted or required by the terms of this Judgment.

If any Plaintiff shall have transferred all of its said water rights and each transferee not theretofore bound by this Judgment as a Plaintiff shall have appeared in this action

1 and filed a valid and effective express assumption of the
2 obligations imposed upon such Plaintiff under this Judgment as
3 to such transferred water rights, such transferring Plaintiff
4 shall thereupon be discharged from all obligations hereunder.
5 If any Plaintiff shall cease to own any rights in and to the water
6 supply declared herein and shall have caused the appearance and
7 assumption provided for in the third preceding sentence with
8 respect to each voluntary transfer, then upon application to
9 this Court and after notice and hearing such Plaintiff shall
10 thereupon be relieved and discharged from all further
11 obligations hereunder. Any such discharge of any Plaintiff
12 hereunder shall not impair the aggregate rights of defendant
13 San Bernardino Valley or the responsibility hereunder of the
14 remaining Plaintiffs or any of the successors.

15 (d) Non-use of any right to take water as provided
16 herein shall not result in any loss of the right. San
17 Bernardino Valley does not guarantee any of the rights set out
18 herein for Western and the other Plaintiffs as against the
19 claims of third parties not bound hereby. If Western or the
20 other Plaintiffs herein should be prevented by acts of third
21 parties within San Bernardino County from extracting the
22 amounts of water allowed them by this Judgment, they shall have
23 the right to apply to this Court for any appropriate relief,
24 including vacation of this Judgment, in which latter case all
25 parties shall be restored to their status prior to this
26 Judgment insofar as possible.

27 (e) Any replenishment obligation imposed hereunder
28 on San Bernardino Valley may be deferred until imported water
29 first is available to San Bernardino Valley under its contract
30 with the California Department of Water Resources and the
31

1 obligation so accumulated may be discharged in five
2 approximately equal annual installments thereafter.

3 (f) No agreement has been reached concerning the
4 method by which the cost of providing replenishment will be
5 financed, and no provision of this Judgment, nor its failure
6 to contain any provision, shall be construed to reflect any
7 agreement relating to the taxation or assessment of extractions.

8
9 XVI

10 EFFECTIVE DATE

11
12 The provisions of Paragraphs III and V to XII of this
13 Judgment shall be in effect from and after January 1, 1971;
14 the remaining provisions are in effect immediately.

15 XVII

16 COSTS

17
18 No party shall recover its costs herein as against
19 any other party.

**ORDER AMENDING THE JUDGMENT
TO CLARIFY THE REPLENISHMENT
OBLIGATIONS OF THE PARTIES**

the motion is to clarify the provisions of the judgment with respect to the computation of the replenishment obligations and credits of the parties to more accurately reflect the intent of the parties and to provide the Watermaster with a clear basis for recomputing, from calendar year 1971, the replenishment obligations and credits of the parties without any duplicate replenishment obligations. James W. Dilworth appeared for Defendant San Bernardino Valley Municipal Water District.

Pursuant to the Court's continuing jurisdiction, and good cause having been shown,

IT IS ORDERED that the motion be granted and that the Judgment herein be amended in the following respects:

First: Section 3 is added to subdivision (c) of Paragraph VI of the judgment (page 14, after line 17) to read as follows:

"3. In determining, for this subdivision (c), the amount of extractions in any period, the extractions for which San Bernardino Valley is obligated to provide replenishment under Paragraph X shall not be considered."

Second: The portion of Paragraph X of the judgment which follows the first sentence is revised to read as follows:

"Western shall be obligated to provide replenishment at or above Riverside Narrows to offset loss of return flow related to any increase over such exports by Western or entities within it from such areas for use within areas not tributary to Riverside Narrows. San Bernardino Valley shall be obligated to provide rpelenishment for any increase over the exports from the San Bernardino

1 Basin Area for use in any area not within Western nor
2 tributary to Riverside Narrows as set forth in Table C-2
3 of Appendix "C," such amounts being subject to correction
4 by the Watermaster, or for any exports from the San
5 Bernardino Basin Area for use in the Yucaipa, San
6 Timoteo, Oak Glen and Beaumont Basins. San Bernardino
7 Valley shall also be obligated to provide replenishment
8 in the Colton or Riverside Basin, as the case may be, to
9 offset loss of return flow related to any increase over
10 the exports therefrom within San Bernardino Valley for
11 use in any area not within Western nor tributary to
12 Riverside Narrows as set forth in Table C-2 of Appendix
13 "C," such amounts being subject to correction by the
14 Watermaster. Against its replenishment obligation to
15 offset loss of return flow related to any increase in the
16 exports from the Colton Basin Area or Riverside Basin
17 Area within San Bernardino Valley, San Bernardino Valley
18 shall receive credit for that portion of direct delivered
19 water which originated outside that Basin and which
20 returns to the ground water of that Basin."

21 Third: The first line of subparagraph (b) of Paragraph XI of
22 the judgment is revised to delete the word "its" and replace it
23 with the words "any future."

24 Dated: FEB 28 1992
